## Wonderful New Offers!

"Special" is the right name for this issue, for in these pages you will find a number of items that are quite special! The response to our listings of late has been very enthusiastic, due, no doubt, to the fact that astute collectors and dealers are sensing many opportunities in a market which is lower in many areas than it was last year. Here at Bowers and Merena, we have been aggressively trying to add to our inventory, but scarce and rare coins are as elusive as ever (which prompts me to say: If you have coins for sale or auction consignment please let us know!).

Morgan dollars are among the most popular American series, and in this issue we have a San Francisco Mint special: Four superb MS-65 coins as a package for just \$665. These aren't just any MS-65 coins, but have been hand selected for sharpness of strike, planchet quality, and overall aesthetic appeal—the "nicest of the nice," so to speak.

Then you will read about a great new book by Q. David Bowers, *A Buyer's Guide to the Rare Coin Market*, which has been a publishing phenomenon. Even before the first copies were distributed, the book was a best seller. Prior to publication we sent copies of the manuscript to the editors of *Coin World* and *Numismatic News*, the executive director of the American Numismatic Association, and other hobby leaders, and their reviews were extremely enthusiastic. The advance orders were simply overwhelming, and if we did not receive a single additional order, the printing would be nearly a sell-out! This dandy volume contains information on many subjects, and will certainly be one of the most valuable books in your library. Read all about it on page 2.

Then follows a special offer on commemorative coins and another on one-year-only design types. You will read descriptions of

the just-published *The Numismatist's Lakeside Companion* and *Coinage Laws of the United States*, after which is information on building a collection of silver dollars.

Next you will find a collection of four "illegal" commemorative half dollars (you'll have to read about these), a special offer involving the dispersal of a little group of 1909 V.D.B. cents we recently purchased, and then a 10% to 20% discount offer on more interesting and valuable books. All of these "specials" add up to some truly great values for you!

**Ordering is a snap.** All you have to do is use the order blank on page 8, or pick up the telephone and dial 1-800-222-5993 (toll free) and have your credit card handy. If you order by telephone, and your order involves books, we'll automatically calculate the appropriate discounts. (Read about our discounts on page 7.)

**Guarantee:** Each coin and book we sell comes with a money-back guarantee of satisfaction. We are not happy until you are.

The year 1991 marks our 38th year in the rare coin business—38 wonderful years of dealing with some of the finest people in the world. Here is wishing you and yours a happy, healthy, and prosperous year to come.

Sincerely,

Mark Borckardt

## Illegal Commemorative Half Dollars?

Depicting living persons on coins and currency has been illegal since 1866, but that didn't stop the issuers of some of our commemorative coins. The result is several fascinating commemorative coins with a special "criminal" appeal for your collection!

The Alabama half dollar depicts Thomas E. Kilby, governor of Alabama when the coins were minted.

Senator Joseph T. Robinson, portrayed on the Robinson-Arkansas half dollar, was alive in 1936, and passed away the following year.

Senator Carter Glass (1858-1946) was profiled on the Lynchburg half dollar in 1936.

Perhaps the most interesting is the Sesquicentennial half dollar, issued in 1926 with the bust of incumbent President Calvin Coolidge.

This collection of four "illegal" commemoratives, each graded MS-63 by PCGS, is offered at \$995<sup>00</sup>.

Order this set of commemoratives, and as a special "Thank You" we will send you a **FREE COPY** of *Coinage Laws of the United States 1792-1894*. See the description of this great book on page 4.

## Limited Lincoln V.D.B. Cent Offer!

**This Issue Only!**  
**MS-63 1909 V.D.B.**  
**Just \$10<sup>00</sup>**

The story of the 1909 V.D.B. cent: In the summer of 1909 the Lincoln cent, designed by noted sculptor and engraver Victor David Brenner, made its appearance in circulation. Brenner was memorialized by having his initials, V.D.B., placed in a prominent position on the reverse of each piece. A public outcry resulted, for many felt that a United States coin was not the place to "advertise" the talents of an engraver. Completely overlooked was the fact that, for example, Augustus Saint-Gaudens' monogram appeared prominently on his \$20 piece of 1907; that George T. Morgan's initial M could be found on the silver dollar, and so on. The Mint acted quickly, and the offending V.D.B. initials were removed. All Lincoln cents coined later in 1909 were without the initials. Years after, in 1918, the V.D.B. initials were restored, but this time in very tiny letters on Lincoln's shoulder, where they could scarcely be seen.

Thus the 1909 V.D.B. cent was isolated as the only year of its design type. The current edition of *A Guide Book of United States Coins* prices an MS-63 example (the highest grade listed) at \$27.50. With this special offer you can buy one (limit—one per customer) coin for a fraction of catalogue—just \$10.

## Unique Proof 1823/2 Quarter

The Finest Known Example of One of America's Most Famous Rarities

**1823/2 Overdate, B-1. Proof-63 (NGC).** A lovely example having frosty design elements and glittering mirror fields. The central areas are brilliant with blushes of delicate champagne iridescence peripherally. The dentilation is full on both obverse and reverse, and the centering is nearly perfect. This specimen is far and away the finest known example of this major rarity.

The 1823 quarter is one of the great rarities in American numismatics. It is doubtful that as many as 25 still exist today in all states of preservation. More significantly, the presently offered specimen is thought to be unique in the Proof format; all the other examples are business strikes and in generally very low grades of preservation (Good to Fine being typical). In terms of preservation, the 1823/2 quarter dollar in any Mint State or Proof grade is far rarer

than even the classic 1827 Original and is dozens of times rarer than the 1796.

The pedigree of this superb piece can be traced to the early part of the 20th century. It was originally acquired by Burdette G. Johnson from an unidentified source in Europe, after which it passed through the hands of Elmer Sears into the famous collection of Waldo Newcomer. Since then it has been owned successively by the composer Jerome Kern, R. L. Miles, H. Philip Speir, and Reed Hawn. In recent years the coin has appeared in Auction '80, Auction '86, and Auction '90.

It is difficult to overestimate the importance of this coin. We suggest that prospective buyers call quickly to avoid disappointment. .... 97,500.00

# Rarities & More

Welcome to our latest *Special Coin Letter*. On the cover is featured the finest known example of one of America's greatest rarities—a Proof 1823/2 quarter, a coin which is usually seen in lower grades of only Good to Fine. This world-class rarity will enhance the cabinet of its next owner, who will have the satisfaction that once he or she owns it, an offer of 10 times the price paid would not secure a duplicate. Here indeed is one of the most significant rarities we have ever offered! And yet the price is less than \$100,000.

Other quarter dollars include an attractive 1796 rarity, a selection of Liberty Seated pieces, and other coins through the Washington series, after which we offer half dollars from 1794 onward.

Silver dollars are highlighted by an attractive 1836 Gobrecht, the famous 1895 Morgan, and other classic issues. All in all there are some really outstanding values for your consideration.

The book section on page 7 contains a listing of some of our most popular titles—among them Q. David Bowers' new book *A Buyer's Guide to the Rare Coin Market*. This critically acclaimed book—filled with information concerning virtually every aspect of the coin market today—was published in early January. The first printing has already sold out, and the book is now in its second big printing! Be sure to order your copy today!

Another book by Q. David Bowers—*United States Commemorative Coins, A Complete Encyclopedia*—is now in the works and is expected to be published by mid 1991. See page 4 to find out how to reserve a copy at the pre-publication price.

All of us here at Bowers and Merena would like to extend our thanks to you for your business, and we look forward to being of service to you.

Sincerely,

# QUARTER DOLLARS

## DRAPED BUST

### Outstanding 1796 25c

1796 Browning-I. VF-20 (ANA Cache). Only 6,146 quarters were struck in 1796. This is an attractive example warmly toned in lilac and heather hues. Approximately 50% of Miss Liberty's hair details are clear, and many of the eagle's wing and tail feathers are boldly rendered. The obverse milling is very sharply pronounced giving the piece a pleasant appearance. 1796 quarters are favorites with collectors for a number of different reasons. First, it is the first year that quarter dollars were coined for circulation in the United States. Second, it is the only date having the Draped Bust obverse in combination with the Small Eagle reverse design. Third, it is the only issue of the denomination coined in the 18th century. | 1852 MS-62. An attractive example of this rare date. The surfaces are deeply mirrored and prooflike. Light golden toning is highlighted with iridescent blue around the periphery. Of the 77,130 examples which were struck, most were probably melted due to the higher value of silver in relation to gold at that time. As such, examples of the 1852 Liberty Seated half dollar are scarce, and specimens of this quality are quite rare. An important opportunity for the specialist. [#22906]..... | 3,350.00 |

Although mintage figures for this year indicate that 880 proofs and 12,000 business strikes were minted, not a single Uncirculated or worn business strike has ever been authenticated, and it is believed that not a single specimen exists today. What probably happened is that the 1900 business strikes were melted under the Pittman Act of 1918, which saw 270 million dollars destroyed. Of the initial Proof mintage of 880 specimens, it is believed that no more than 500 specimens survive today in various conditions.

## Now is the Time to Buy... Coins and Books

Enthusiasm is the order of the day in the coin market! Following the doldrums of late 1990, the market has taken off with a bang—"bid" prices are up for many series on the Teletype, and our business here has been excellent. Nowhere has this been more evident than in our Want List Program, which has seen several records set during the past two or three months.

To build our inventory and to supply our client's needs we have been buying as many nice things as we can—by means of a nationwide campaign and by in-person visits all across the country. Mark Borkardt purchased a dandy collection in California, Frank Van Valen has made several stops at various points around the East and Midwest, and others have been buying as well. Let me remind you that when time comes for you to sell, we are always interested in buying important collections outright or accepting them for auction. Buying coins seems to be our main problem; there is no problem selling—the coins sell themselves!

This issue of the *Special Coin Letter* begins with a nice selection of commemorative silver coins, followed by commemorative gold, some attractive half cents, some very important large cents, and a selection of small cents. On page 7 you'll find a list of some interesting numismatic books worthy of consideration. Speaking of books, don't overlook the opportunity to send in your order right away—at a pre-publication price plus an extra discount—for Dave Bowers' forthcoming book, *Commemorative Coins of the United States, A Complete Encyclopedia*.

I look forward to receiving your order from this issue. My staff and I are just a toll-free call away at 1-800-222-5993, or use the handy order blank on page 8. Either way, your complete satisfaction is guaranteed. We have the right coins for you at prices you'll find to be very attractive. And, each and every coin comes with a money-back guarantee of satisfaction.

Sincerely,

Liz Arden

## ON ITS WAY TO BEING A BEST SELLER!

### COMMEMORATIVE COINS OF THE UNITED STATES *A Complete Encyclopedia*

by Q. David Bowers

This great book, originally announced to be over 400 pages, but now almost certain to be over 500 pages, is nearing completion of the manuscript. Dave Bowers anticipates completing the book within the next two months, and having it published by early summer. In the meantime, if you order now, you can take advantage of special discount prices, and also be assured of being among the first to receive your copy when publication takes place.

*Commemorative Coins of the United States* is like no other book ever printed on the subject. This immense (8½ x 11 inches in size, over 500 pages), profusely illustrated volume will tell everything you always wanted to know about commemoratives from the 19th century down to the very latest issues—including behind the scenes information, collecting and grading tips, a complete market survey for each piece since the time of its issue, historical background, and much, much more. Don't take our word for it—you be the judge. Your book comes with a money-back guarantee of satisfaction if you are not completely delighted.

Two ways to save: The following are the prices for this book which we computed when we thought the book was going to be about 400 pages in size. Now that we realize it will be over 500 pages in size, we plan to raise these prices soon. However, right now you can order at the "old price." And, that's not all! There is a second way to save: Take a confidential 10% discount off of these already low prices—increasing your savings even more.

The book is available in the following formats and prices:

Softbound (Stock No. BBM-308) \$24.95

Hardbound (Stock No. BBM-308A) \$34.95

Deluxe Limited Edition Hardbound, individually numbered, autographed, special binding. (Stock No. BBM-308B) \$49.95

Status Update: Orders have been pouring in for this book, and we are absolutely delighted! In case you're wondering, most orders are for the softbound edition (which is to be expected because of the lower price), but, surprisingly, next most popular is the Deluxe Limited Edition Hardbound at \$49.00 (Less, of course, your 10% discount)—a limited edition of which only 900 copies will be made. If you want to be assured of receiving one of these deluxe versions, we strongly suggest you order as early as possible.

This is really going to be a great book—we have seen the advance manuscript and it is sensational—interesting—and fascinating to read!

1922 Grant With Star. AU-58. Beautiful satiny mint lustre and frost complement sharp central devices. A gorgeous coin that would make a handsome addition to any commemorative gold coin collection. Call quickly on this beauty! [30070] ..... 2,395.00

1922 Grant. No Star. AU-50. Although it was lightly cleaned at one time, this coin still exhibits nice detail and mint lustre in the protected areas. Just 5,000 pieces were minted. [30069] ..... 1,750.00

1926 Sequentennial quarter eagle. AU-58. Full mint bloom. [30079] ..... 415.00

1984-S Olympic eagle. Proof-65. A nice example. [21626] ..... 250.00

## HALF CENTS

1795 Cohen-5b. Good-5. Rarity-4. 104.4 grains. Struck on a light tan planchet. The central motifs on the reverse have been worn smooth. The obverse still shows nice definition for the grade. [29009] ..... 435.00

### Condition Census 1795 Half Cent

1795 Punctuated Date. Plain Edge. Breen-4-2C. C-4. AU-58. Condition Census. Hints of mint are present on fully lustrous fields. Breen lists six Uncirculated examples in his *Encyclopedia of United States Half Cents 1793-1857*. Some weakness in strike is evident in the central portions of the obverse and reverse motifs. A slight die bulge is noted in the right obverse field, which is typical for the variety. Commonly referred to as the Punctuated Date variety due to a die chip in the field between the 1 and 7 which looks similar to a comma. Many of the 1795 half cent varieties were struck on poorly mixed and annealed copper blanks which tended to produce a higher percentage of pieces with chipped, cracked or split planchets, as well as a wide range of weights. The standard weight of the issue was 84 grains, but some pieces struck weighed as much as 89.6 grains. A prize for the specialist. [24199] ..... 7,450.00

1804 Spiked Chin. B-6. C-6. Die State 11. F-15. An elusive issue. [28969] ..... 150.00

1804-• B-8, C-9, F-15. [#29035] \$95 • B-9, C-10, F-15. [#31169] \$59 • C-10, AU-53 (NGC). Rich glossy brown coloration is present over well protected fields. This is a handsome coin which would enhance an early type set. [#30066] ..... 395.00

1805 Large 5. Stems. C-4, B-4, VF-35. A pleasing piece exhibiting light brown fields and well struck design elements. [#31551] ..... 265.00

1807 B-1, C-1. VF-20 [#29042] ..... 125.00

1808 B-3, C-3, F-15. Well preserved for the grade. The surfaces are porous-free and are tan in coloration. [#31170] ..... 125.00

1826 B-2, C-2. VF-20. [#20124] ..... 79.00

1828 12 Stars: • VF-20, C-2, B-3. [#29050] \$65 • VF-20. [#4771] \$79 • VF-30. [#4774] ..... 95.00

The 1828 12 Stars half cent is the only issue of its denomination bearing the wrong count of 12 obverse stars. Apparently someone at the Mint was not paying attention and arranged the stars improperly. Another notable issue with this errant star is the 1832 \$5 gold piece.

1832 C-3, VF-30. The fields on this coin are light tan. [#30450] ..... 49.00

1835: • B-1, C-1, EF-40. [#29365] \$75 • C-2, EF-40. [#30451] \$75 • C-1, EF-45. [#31033] \$89 • AU-55. [#26691] ..... 169.00

1849 Large Date: • AU-50. Sharply struck devices are surrounded by brick red fields. [#31171] \$225 • AU-58. This piece is lustrous and attractive. Sure to please the discriminating collector. [#31034] ..... 350.00

1853: • B-1, C-1, EF-45. [#29997] \$95 • C-1, AU-50. [#30452] \$145 • MS-64 BN (NGC). Frosty and lustrous with hints of mint red around the devices. A handsome piece for a high-grade type collection. [#30030] ..... 725.00

## LARGE CENTS

1793 Chain America. Sheldon-2. G-4/VG-8 (ANA Certificate). Some minor rim bumps are noted for accuracy and can be detected in the photograph. The word LIBERTY and the date on the obverse are clearly visible, and the central design elements are sharp for the grade, as well. The chain is very bold as is the peripheral lettering on the reverse. A nice opportunity to add this famous and highly important type to your collection. Call quickly on this one! [#31173] ..... 2,950.00

Referred to as the Widest Date variety. It is believed that approximately 5,000 specimens were coined.

### Impressive 1793 Liberty Cap Cent

1793 Liberty Cap. Bisecting Crack. S-14, Rarity-5. EF-40. Absolutely superb surfaces with

light olive-brown color. A tiny scratch is noted behind the curls and probably should not even be mentioned, for it blends nicely with the color of the coin. Obverse and reverse beading is complete and sharp, providing a well-centered appearance. Careful inspection indicates the edge was lettered twice. The obverse die crack from top to bottom is visible on every known example of this variety and serves as an instant attribution aid. This specimen was offered as Lot 25 of Auction '90 as third finest known although actually ranks as fifth finest known and is virtually tied with the Norweg example as fourth finest known. Here indeed is an American numismatic classic that has it all: basic rarity, the first year of its type, high grade, and superb aesthetic appeal. The connoisseur will appreciate this coin as one of the highlights of his collection. [#28784] ..... 38,500.00

### Outstanding 1795 Jefferson Head Cent

1795 Jefferson Head. S-80. Rarity-5+. VG-10.

From our sale of the Norweg Collection, November 14-15, 1988, Lot 2740. Toned deep olive brown with uniform light porosity noted on obverse and reverse surfaces. Some minor edge nicks are noted along with a small attempted puncture just below the obverse center. Sharpness is at least VF-20 with the defects noted mentioned to provide an accurate description of this interesting issue. This example, formerly Lot 74 of the 1953 ANA Convention Sale, just misses the low end of the condition census which ranges from VF-35 down to F-15. [#28801] ..... 21,500.00

It is believed that the Jefferson Head cent was privately issued by John Harper early in 1795 as an example of his work, as an attempt at securing a private coinage contract. Congress held hearings concerning the proposal of closing the Federal Mint in lieu of coinage contracts being provided to outside agencies. We invite interested readers to consult *Walter Breen's Complete Encyclopedia of U.S. and Colonial Coins* available from our Publications Department.

1798 S-162. Rarity-4. G-4. Exhibits bold date. [#30504] ..... 65.00

### Classic 1799/8 Overdate Cent

1799/8 S-188. Fine-12. A sharp example of this classic large cent rarity. The central design details are very sharp for the grade, but there is a trace of porosity in the fields. An important opportunity for the large cent specialist. Complete satisfaction guaranteed, as always [#18302] ..... 4,950.00

### Historical 1799 Large Cent

1799 Unique Die State. S-189. VF-30/30 (ANA Certificate). The reverse is lightly corroded as noted on the ANA certificate. Dr. Sheldon notes "one example is known, about VF-30, with the reverse breaks at their heaviest, and with a straight line obverse crack..." We are not aware of a second specimen displaying this crack. This historic cent has found its way into the collections of such notable numismatists as Newcomb, Sheldon, Paschal, Naftzger, Halpern, and Hettger. Illustrated in Sheldon's reference and featured as the *Guide Book* plate coin from 1963 through 1965. The historical pedigree combined with the unique die state provides an opportunity not to be missed. [#28802] ..... 11,795.00

1804 Restrike. MS-60. Superb surfaces with light tan faded from mint red. Struck in the 1860s to create a cent bearing the 1804 date. The obverse was that of 1803 S-261 (altered to 1804) with the reverse from a reground die of 1820. [#28788] ..... 695.00

1806 S-270. EF-40. Sharply struck with almost all of Liberty's hair strands showing full definition. A tiny nick is present in the field in front of Liberty's nose, as illustrated. Only a tiny proportion of the survivors of this issue are this nicely preserved. Certainly, here is a prize for the advanced specialist. [#27925] ..... 1,150.00

1813 S-293. F-15. Deep chocolate brown fields. A slightly better date in the short-lived Classic Head cent series (minted from 1808 through 1814) [#31553] ..... 295.00

1814 Plain 4. S-295. AU-50 (ANA Cache). A superb example of the Classic Head type, with glossy chocolate brown fields. The devices are sharper than generally encountered on this issue. A nice piece for a large cent collection or an early type set. [#29490] ..... 2,150.00

1814 Plain 4. S-295. AU-50 (NGC). Beautiful mint lustre is noted over satiny medium brown fields. Sharp definition is present among the design elements. An interesting die crack runs through the numeral 8 of the date, passing through the lower curl of Miss Liberty's hair and out to the rim after bisecting two lower points on the fourth star. [#31037] ..... 2,150.00

1817 Newcomb-3. R-2. AU-50. A pleasing example with just a few minor marks on the obverse, which displays pleasing dark brown toning with lighter tan and dark brown displayed on the reverse. An exceptional candidate for the date or type collector. [#28817] ..... 575.00

1817 N-8. R-2. AU-50. Choice surfaces exhibit mixed brown shades. The devices are highlighted with lustre while a few minute marks are present on the obverse. An early die state without the "mouse" die break above Miss

Liberty's head. [#28818] ..... 650.00

1819 Large Date. N-2 • EF-40. [#29993] \$185 • EF-45. Attractive surfaces with deep brown toning. Intermediate die state with die cracks noted through the date and stars. Light die rust is present around the upper stars on the obverse and the reverse legends. [#28915] ..... 275.00

Die rust appears as raised dots on the coin. This should not be confused with porosity and does not affect the value of a coin.

1820 N-12. Rarity-3. AU-58. The surfaces are lustrous and dark brown. Hair and leaf details are well defined on this early die state. An exceptional example for the date or variety collector. [#28916] ..... 675.00

1821 N-1. F-12. [#26431] ..... 175.00

1822 N-11. EF-40. Soft brown fields are heightened by sky blue overtones. The design elements are quite sharp with just a trace of rubbing on the high points. [#29994] ..... 375.00

1823/2 N-1. VG-8. [#29137] ..... 135.00

1824 N-2. EF-40. Well centered and attractive with brick red toning. All of the border denticles are fully defined. A small rim bump is noted at 4:00 on the obverse. A scarce date in the series. [#29115] ..... 525.00

1825 N-10. G-4. Late die state. [#30505] ..... 200.00

1826 • N-4. EF-40. Pleasing medium brown surfaces. [#27935] \$235 • N-5. EF-40. Appealing

tobacco brown toning. Much frosty mint lustre can be seen in the fields. [#27917] \$375 • N-4. EF-45. Beautiful, glossy brick red coloration. Sharp and attractive in every way. [#29351] \$325 • N-9. R-3. AU-50. A scarce variety displaying choice surfaces and pleasing olive-brown color. [#28794] ..... 725.00

1827 N-1. VF-20. [#29141] ..... 75.00

1827 N-2. EF-45. Dark brown with choice surfaces. According to current Condition Census information available to us, this attractive specimen is tied for seventh finest known for the variety. [#28796] ..... 1,275.00

1829 N-5. Obverse brockage. VF-35. Deep chocolate brown with pleasing glossy surfaces typical of the planchet stock of the year. Struck just slightly off center to the left, but lacking only the denticles to complete the obverse type. Bold obverse brockage, the "reverse" of the piece showing the incused and reversed outline of the obverse die design in much sharper detail than the design can be seen intaglio on the obverse. The line that can be seen on the brockage side at 10:00 was caused by a small piece of wire which came between the planchet the obverse of the coin which had been stuck in the dies, and which caused the brockage. Large cent errors are generally rare, and are eagerly competed for. Spectacular ones, such as full obverse brockages, are extremely rare and highly desirable. [#18635] ..... 1,795.00

1829 N-6. EF-40. An attractive, medium brown piece. [#29114] ..... 275.00

1831 N-1. AU-55. Sharp and lustrous. The surfaces are brick red in color and enhance boldly struck devices. [#28920] ..... 595.00

1831 N-11. EF-40. [#29111] ..... 195.00

1833 N-6. VF-30. [#27939] ..... 110.00

1835 N-18. Rarity-6. AG-3. An extremely elusive and highly desirable die combination. Much sharper than the grade would indicate, but mounted at one time and therefore conservatively graded AG. Satisfaction guaranteed, as always when you order from Bowers and Merena Galleries. Call quickly on this rarity! [#30506] ..... 375.00

1836 • N-3. EF-40. [#30453] \$125 • N-3. MS-62 BN. (PCGS). Lustrous tan fields are toned in splashes of gunmetal-blue toning. Well struck. [#27927] ..... 495.00

1848 Small Date. Fine-12. 151.5 grains. A planchet clip is noted from 12:00 to 2:00 on the obverse—as evidenced by the photograph. One of only seven known. The 1848 Small Date cent is certainly a mysterious issue and may have been product of private enterprise. It is surmised that they may have been made in New York. Only seven survivors have been traced, and this is the only example of the seven that has been triple struck. A prize for the large cent connoisseur. [#28800] ..... 9,850.00

## Enthusiasm is the Order of the Day!

Half dollars and silver dollars, listed through Morgan issues, are featured in this *Special Coin Letter*. Each coin is carefully graded, carefully described, and priced to be an outstanding value. We welcome your order. Call toll free or send your order by mail. Either way, some really great coins will be arriving in your mailbox soon!

Enthusiasm is the order of the day. Often activity in rare coins occurs far in advance of economic indicators (or independently of them). Whatever the case may be, the coin market has picked up sharply, and we have been very busy lately, looking for old-time collections and other choice material to buy outright for our inventory, or to accept as consignments for our continuing program of auction sales.

Dave Bowers' new book, *United States Commemorative Coins, A Complete Encyclopedia*, is going to be absolutely fantastic—those who have seen the manuscript agree! We don't have a final page count yet, as it is still in the working stage, but it is certainly going to be in the 600-page range, and may be even longer. The book will be a large 8½ by 11 inch format, completely illustrated,

and will have a wealth of information not available in any other single volume. See page 2 for details and special pre-publication prices.

In this issue we are also offering a set of gem Proof coins designed by Frank Gasparro, former Chief Engraver of the U.S. Mint. You'll find details on page 4. On page 6 read about our extremely popular Collection Portfolio Program, and the special bonuses, worth over \$75, we are offering if you sign up right now! The CPP has been very popular for years, and represents an ideal way to build a magnificent collection—and each coin is absolutely guaranteed regarding grade, aesthetic appeal, and price.

Thank you for the business you've been sending our way. Here at Bowers and Merena Galleries we all look forward to your order.

Sincerely,

Raymond N. Merena  
President, Bowers and Merena Galleries, Inc.

## HALF DOLLARS

### FLOWING HAIR

1794 Flowing Hair. Overton-101. Rarity-3. F-15 (PCGS). A beautiful example of this first year issue of Robert Scott's Flowing Hair design type. Rare, a mere 23,464 half dollars were struck in 1794. This specimen is extremely attractive for the grade. The central motifs are sharp and well centered on a planchet that is free of detracting marks and scratches. Gunmetal-blue and gold toning is seen over pearl gray fields. This coin is sure to make a welcome addition to an early type collection. Call quickly on this one! [#22550] ..... 3,750.00

### DRAPED BUST

1806 Pointed 6. No Stems. O-109. AU-50. An exceptional example of the variety with a very sharp strike. Fully lustrous and attractive with wisps of orange toning in protected areas. Surely this will make a handsome addition to a connoisseur's collection. Call quickly on this one! [#30118] ..... 2,350.00

cleaned at one time, but still highly lustrous and attractive. Satisfaction guaranteed. Mostly brilliant with a faint whisper of amber peripheral toning. A popular variety among Capped Bust half dollar collectors, with the reverse denomination originally entered erroneously as 20 (the engraver thought he was working on a 25¢ piece and erroneously entered the numeral 2, then corrected it). [#30263] ..... 1,295.00

1807 Capped Bust. Small Stars. O-113. EF-40. Lightly cleaned fields are toned in pale gunmetal-blue. Typical weakness in strike noted in the wing definition on the left side of the eagle. An issue we have not offered for quite some time. [#30264] ..... 875.00

### Attractive Mint State 1852 50c

- 1852 MS-62. An attractive example of this rare date. The surfaces are deeply mirrored and prooflike. Light golden toning is highlighted with iridescent blue around the periphery. Of the 77,130 examples struck, most were prob-

ably melted due to the higher value of silver in relation to gold at the time. As such, examples of the 1852 Liberty Seated half dollars are scarce, and specimens of this quality are quite rare. An important opportunity for the specialist. [#22906] ..... 3,350.00

- 1855/1854 Arrows at Date. EF-45. Breen 4858, "Very Rare". Under magnification, the remnants of the underlying numerals 854 can be seen below the overpunched 855. This example is light silver gray on both obverse and reverse, with areas of darker charcoal on the reverse. This variety discovered by Walter Breen in 1970: Proof specimens (for example, Norweb:3166) were discovered by Q. David Bowers. [#22078] ..... 435.00
- 1855-O Arrows. EF-40. [#32552] ..... 125.00

## LIMITED EDITION FRANK GASPARRO COIN SET

**F**ranks Gasparro is well known to our clients as the designer of our Bowers and Merena medals, and to people throughout the country as the Chief Engraver of the United States Mint from 1965 until 1981. Even in retirement, Frank Gasparro has made news. He recently put his considerable talents into service to design the reverse of the Mount Rushmore half dollar. But during his tenure as Chief Engraver, the highest office to which an engraver can aspire, he created the new designs for four United States coins: The 1959 Lincoln cent Memorial Reverse; the obverse and reverse of the 1964 Kennedy half dollar; the obverse and reverse of the 1971 Eisenhower dollar; and the obverse and reverse of the 1979 Susan B. Anthony dollar.

We at Bowers and Merena would like to offer you the opportunity to own these four beautiful pieces in the form of a *strictly limited edition* set, personally certified by Frank Gasparro! Each coin in the set is a Gem Proof—the finest quality available—and each represents the first year of issue of the design. The set is mounted in a custom made plastic display holder. The background of the holder is glossy black to show the coins to full advantage, and is imprinted with beautiful gold lettering. At the center of each is the hand numbered Personal Certification, signed by Frank Gasparro.

Each of these impressive limited edition sets is just \$125, a small price to pay to possess a memento of our national history!

The first of these sets (No. 1 through No. 4) have been presented, respectively, to Frank Gasparro, the National Coin Collection at the Smithsonian Institution, the American Numismatic Society, and the American Numismatic Association. Of the remaining 996 sets, hundreds have been sold to appreciative collectors, dealers, and museums. Once these sets are gone, they will not be available again to anyone, for any price!

To order this set, call our toll-free number, 1-800-222-5993, and charge it to your VISA, MasterCard, or American Express, and we will send your set to you immediately. Or call and reserve your set, and we will ship it to you with the arrival of your check. Either way, call now, these sets won't be around forever!

dollar collection. [#31205] ..... 2,250.00

1796 Small Wide Date. B-2. VF-20. Well defined reverse design. This attractive dollar exhibits many claims to a higher grade. Lightly cleaned long ago. Naturally retined in pale shades of silver gray and gold. [#30631] ..... 1,850.00

1799/8 B-1. EF-40. Mostly bright surfaces. Once cleaned long ago, now retined a light lilac. Quite pleasing overall. [#26936] ..... 1,950.00  
The reverse is from a late state of the dies and is extensively cracked, indented shattered, with a major crack extending from the edge of the ribbon above P in PLURIBUS through the clouds, through the base of ES, to the upper left of O, and then to the border, while a related break goes through the upper areas of ATES, and still another break goes through the lower areas of OF, through the eagle's wing, ending at the ribbon end. A further break is seen from the border above A, extending through MER, culminating in a large area of the dies at L.

1799/8 B-1. 13 Stars reverse. EF-45 (PCGS). The overdate features are boldly evident to the unaided eye. The reverse of this popular die variety is easily identified by the heavy die flaws around RI of AMERICA. A sharp edge lightly toned in pleasing shades of medium charcoal gray. [#24720] ..... 2,295.00  
The obverse for the 1799/8 was intended for the 1799 Wide Date group, but the die was never used. Early in 1799, the die was pressed into service after the 8 in the date was repunched with a 9.

1800 VF-30. An attractive example with pale rose and soft gray toning highlights. A nicely centered example, with some striking weakness at the eagle's breast feathers on the reverse, as often seen for this issue. [#30632] ..... 750.00

### GOBRECHT

1836 Gobrecht dollar. Plain Edge. Name on Base. Restrike. Die Alignment III. Judd-60. Proof-62 (PCGS). A sharp and attractive example of this desirable issue, with the reverse eagle flying level and dies rotated 180°. A pale

golden example, one of an estimated 1,000 pieces minted. Here is an exciting opportunity for the advanced silver dollar specialist! [#19080] ..... 10,900.00

### LIBERTY SEATED

1842 EF-40. Mostly brilliant. The central devices are frosty. [#31022] ..... 350.00

1843 Extremely Fine-40. Cleaned at one time. [#30633] ..... 295.00

1845 EF-45. [#31845] ..... 625.00

1846 AU-58. Brilliant, frosty and fully lustrous. The design devices are struck to full advantage. A beautiful example. [#26760] ..... 1,275.00

1846-O AU-55. A choice example of our nation's first branch mint silver dollar coinage. A sharp example of this elusive New Orleans issue, lightly cleaned long ago and naturally retined in pale golden hues. [#31010] ..... 1,395.00

1850-O EF-45. Pleasing shades of lilac, pale gray, and soft gold enhance the well-struck design elements popular New Orleans. Just 40,000 pieces were struck of this elusive issue. Please call quickly on this one, as it has been some time since we have offered this date, and it may be quite some time before it is offered again! [#30965] ..... 1,650.00

1855 VF-20. A rare and desirable Liberty Seated dollar issue, much more elusive than its already low mintage of 26,000 pieces indicates. Strong central details for the grade, with pale rose and gold toning highlights on pleasing surfaces. Some minor marks are noted beneath the ST of STATES on the reverse. [#30123] ... 1,495.00

1856 EF-40 (PCGS). Mottled amber and silver gray hues grace attractive reflective fields. Much scarcer than its mintage figure of 63,500 pieces would indicate. Some striking weakness is noted

## SILVER DOLLARS

### DRAPED BUST

1795 Draped Bust obverse. Small Eagle reverse. Bolender-15. VF-20 (ANA Certificate). First year of this design type. A highly desirable issue, one of two die varieties with Draped Bust obverse minted this year. Choice for the grade. Virtually mark-free fields and surfaces exhibit silver gray toning with golden highlights. Sharply struck on both sides, with the design elements well centered and virtually all of the border details visible. A lovely piece which will make a great addition to an early silver

on the reverse, as often seen for this issue.  
 [#31087] ..... 975.00

## Mint State 1857 Seated \$1

1857 MS-60. Well struck for the issue, with much of Liberty's hair detail in evidence. Appealing pale golden highlights encircle brilliant central devices. Lightly cleaned long ago, yet still very attractive. [#31008] ..... 3,650.00  
 With the exception of just two or three issues, all Liberty Seated dollars are considered very rare in Mint State!

1859-O EF-40. Lightly cleaned. [#30124] ..... 265.00  
 1860-O EF-40. Mostly brilliant. .... 325.00

1867 AU-50. A sharply struck example of this desirable issue, scarcer than its low mintage figure of 46,900 pieces implies. The bold central devices are enhanced by attractive mint frost. [#31164] ..... 895.00

1870-CC: • G-6. [#32142] \$235 • VF-35 (NGC). Frosty with exceptional aesthetic appeal and sharp detail present on the devices. A scarce Carson City Mint issue. Just 12,462 pieces were coined. Click quickly on this lovely specimen! [#32350] ..... 825.00

1872-S EF-45. One of just 9,000 examples minted at the San Francisco Mint this year! Generally seen low grades, this attractive example is a pleasing exception to that rule. Lightly cleaned long ago and naturally retined in shades of pale gold. Some minor striking weakness is noted at Liberty's head, as generally encountered for this issue. An aesthetically appealing example of this desirable issue. [#31009] ..... 1,095.00

Although the Liberty Seated dollar series was minted from 1840 through 1873, the San Francisco Mint issued coins in just four years!

## MORGAN

1879-CC Normal Mintmark. MS-63 (PCGS). A pleasing Mint State example of this very desirable Carson City Morgan dollar issue. Delightful cartwheel lustre reflects from frosty, satini-like surfaces. Please order quickly, as attractive examples of this issue seldom remain for long in our stock! [#31067] ..... 2,950.00

Of the two mintmark varieties known for this issue, the Normal Mintmark issue is considered much scarcer than the Capped Mintmark variety.

1879-O MS-64 (PCGS). Brilliant, lustrous and untuned. A lovely specimen of issue of the new Morgan dollar type from the New Orleans Mint. [#24756] ..... 725.00

## Prooflike 1889-CC Dollar Rarity

1889-CC MS-62 DPL. (NGC). A glittering example of the most desired of all Carson City dollars. Fully brilliant with deep prooflike surfaces and heavily frosted devices. Rare in this superb state of preservation. A must for the Morgan dollar specialist. [#22378]...29,500.00

1889-S MS-64 (PCGS). [#32440].....525.00

1890-CC MS-63 (PCGS). Lustrous with whisks of fiery orange toning. [#32441].....425.00

1890-CC MS-64. A frosty gem example of this popular issue, with bold cartwheel lustre on pleasing surfaces [#22543].....1,195.00

1890-O MS-64 (NGC). [#29431].....450.00

1890-S: • Mint State-60 [#27462] \$49 • MS-64 [#29975].....210.00

1891-CC MS-63 (PCGS). [#31044].....295.00

1891-S: • MS-60 PL. [#31115] \$52 • MS-63 [#32648] \$135 • MS-63 (PCGS). [#24280] \$35 • MS-64 (PCGS). Brilliant. [#25756].....425.00

1892 AU-50. [#32561].....59.00

1892-S VF-30. [#31151].....49.00

1893 MS-64 (PCGS). Popular low-mintage issue, fewer than 400,000 silver dollars were struck at the Philadelphia Mint this year. The obverse of this piece is lightly toned in pale yellow-brown shades, while the reverse is lustrous and untoned. [#22834].....1,995.00

1893-CC: • MS-60. A frosty, sharply struck example of the final year of Carson City coinage. [#31181] \$925 • MS-63 (PCGS). Frosty surfaces enhanced by brilliant cartwheel lustre. A well struck example for the Morgan dollar connoisseur. [#24190].....3,275.00

1893-O MS-62 (PCGS). Delightful cartwheel lustre radiates from the frosty surfaces of this scarce example. Relatively free of the bagmarks that are usually associated with this issue. Some striking weakness is present, as nearly always seen on New Orleans Morgan dollars. [#30968].....2,150.00

## Exceptional 1895 Proof-65 Dollar

The King of Morgan Dollars

1895 Proof-65 (Hallmark). A dazzling example of the King of Morgan Dollars. Deep mirrorlike fields are enhanced by a hint of pale golden toning. A superb example in every respect, sharply struck and aesthetically appealing. A certified prize for the Morgan dollar specialist. [#22847].....39,500.00

Although mintage figures for this year indicate that 880 Proof examples and 12,000 business strikes were minted, not a single Uncirculated or worn business strike has ever been authenticated. It is believed that the 12,000 business strikes were melted under the provisions of the Pittman Act of 1918, which saw some 270 million silver dollars melted. Or the existing Proof examples known today, just a very small quantity can match the aesthetic quality of the piece offered here.

1895-O: • VF-30. [#26267] \$145 • EF-40. [#24550] 169.00

1895-S MS-64 (NGC). Frosty devices and mirror fields are attractively toned in pale shades of rose and gold. Of the initial mintage of 400,000 pieces, only a very small percentage have survived in Mint State. A very elusive issue, as are all the branch mint Morgan dollar issues of 1895. A prize for the specialist. [#22836] 5,750.00

1896: • MS-63 [#15147] \$49 • MS-63 (PCGS). [#32021] \$49 • MS-64 (PCGS). [#25692] 85.00

1896-O: • AU-50. [#32562] \$115 • MS-62 (PCGS). Strong mint brilliance with very pleasing deep fiery orange peripheral toning on the obverse. The reverse is brilliant and lustrous. [#26728].....1,995.00

1897 MS-63 (PCGS).....49.00

1897-O AU-50. [#32563].....65.00

1897-S: • MS-64 (NGC). [#25777] \$245 • MS-64 (PCGS). [#23343].....245.00

1898: • MS-63 [#24925] \$49 • MS-63 (PCGS). [#29701] \$49 • MS-64 (PCGS). [#22838].....85.00

1898-O: • MS-62 (PCGS). [#31452] \$35 • MS-63 (PCGS). [#23024] \$45 • MS-64 (PCGS). [#25395] \$75 • MS-65 (PCGS). [#29959].....199.00

1898-S MS-63 (PCGS). Subdued lustre with attractive fiery orange and gun metal blue peripheral toning. [#32362].....265.00

1899-O: • MS-63 (PCGS). [#23025] \$45 • MS-64 (PCGS). [#25396] \$85 • MS-65 (PCGS). [#29962].....205.00

1899-S MS-64 (PCGS). A frosty, attractive example of this issue. [#221801].....625.00

1900: • MS-63 (PCGS). [#29739] \$49 • MS-64 (PCGS). [#25725].....85.00

1900-O: Mint State-60. [#29076] \$30 • MS-63. [#29086] \$49 • MS-63 (PCGS). [#23028] \$49

• MS-64. [#24396] \$85 • MS-64 (PCGS). [#25399].....85.00

1900-S MS-64 (PCGS). [#31854].....485.00

1901 MS-62 (NGC). The 1901 is generally recognized as the rarest regular issue Morgan dollar in Mint State grades from the Philadelphia Mint. Well struck for the issue, with lustrous, reflective fields toned in pleasing shades of golden orange. Ideally suited for inclusion in an advanced cabinet. [#22632].....3,750.00

1901 Proof-62. One of just 813 Proof examples minted this year. Deep mirror fields are graced with lovely shades of deep amber and gold. Proof examples of the 1901 Morgan dollar are eagerly sought by collectors owing to the scarcity of Mint State examples of this issue. It seems curious, doesn't it, that a Proof should sell for considerably less than a Mint State example of this date? [#24845].....2,150.00

1901-O: • MS-63 (PCGS). [#29752] \$49 • MS-64 (PCGS). [#29887].....85.00

1901-S MS-64 (PCGS). Well struck frosty devices and satinelike surfaces add to the aesthetic appeal of this popular San Francisco Mint issue. [#30901].....935.00

1902-O: • MS-63 (PCGS). [#29761] \$45 MS-64 (PCGS). [#29897].....85.00

### Think of Bowers & Merena

### For Buying and Selling

SPRING IS IN THE AIR, and a young man's fancy turns to thoughts of buying coins (and to other things as well). Actually, a lot of people's thoughts are turning toward buying coins, for business has been very strong lately. It never was weak, not even during the slump experienced by the investment market in late 1990. As we go to press, orders are coming in strongly from our publications, and all seems to be set for a lot of activity!

IN THIS ISSUE, we are offering a nice selection of coins from two-cent pieces through quarter dollars, silver Peace dollars, and gold dollars from 1851 to 1875. Included in the Peace dollar listing is one of the most comprehensive offerings of the 1934-S it has ever been our privilege to present for sale. This, of course, is the key to the series. Relatively few exist in the higher grades, especially of the hand-picked quality we offer. If you've had your eye on a 1934-S, why not take the plunge and buy one of ours? Your complete satisfaction is guaranteed, as it is on everything you buy from Bowers and Merena Galleries.

WHILE THE EMPHASIS of this issue is on selling coins, when time comes for you to offer your collection, remember that we are always buyers of choice numismatic properties for direct purchase or for consignment to our auctions. Thinking of selling? When the time comes, just let us know.

ALL GOOD WISHES TO YOU from all of us here at Bowers and Merena Galleries. We look forward to receiving your order.

Sincerely yours,

*Mark Borckardt*

## Rare 1899/8 Overdate 5¢

**1899/8 Overdate. MS-62 (PCGS).** Rare. Although this coin is encapsulated as just a regular 1899, close inspection of the piece shows that the grading service missed the overdate, which appears as a bold 8 beneath the final 9 in the date. The coin is sharp and frosty and pleasantly toned in light hues, adding to the overall appeal of the piece. A prize for the Liberty Head nickel specialist. .... 3,795.00

The following paragraph is taken from an article titled "The Liberty Head Nickel: An Affordable Series," written by David W. Lange in the February 1989 issue of *The Numismatist*, page 259: "As a rule, Liberty Head nickels are not sought for their interesting varieties; none is listed in the *Red Book*. However, one variety has gained some popularity among specialists. A few 1899 nickels have been found that show traces of an 8 underneath the final digit. In fact, these appear to be two varieties of the 1899/8 overdate, both of which are very rare."

## DIMES

### DRAPED BUST

- 1805 John Reich-2. 4 Berries reverse. F-15. Silver gray fields are very well preserved and virtually mark free! The devices are bold and sharp and the coin is close to VF status overall. A superb example (for the grade) for an early type collection. Call quickly—this piece will not last long! Although this time is dated 1805, it is believed by some researchers that such pieces were actually struck in 1807—\$975.00
- 1805 JR-2. 4 Berries reverse. AU-50. Lightly brushed. Sharply struck and quite pleasing, with many separated hair details on the obverse and virtually full wing and tailfeather detail on the reverse. Obverse pale silver gray, with a touch of champagne at the date; reverse pale gray centers, champagne and iridescent blue peripheries. Typical die states. Same obverse as the 5 Berries reverse; only appearance of this reverse die—\$2,895.00

### Lovely AU-58 1805 Dime

## QUARTER DOLLARS

## DRAPED BUST

## Outstanding 1796 25¢

1796 Browning-1. VF-20 (ANA Cache). Only 6,146 quarters were struck in 1796. An attractive example warmly toned in lilac and heather hues. Approximately 50% of Miss Liberty's hair details are clear, and many of the eagle's wing and tail feathers are boldly rendered. The obverse milling is very sharply pronounced giving the piece a pleasant appearance. 1796 quarters are highly important for several reasons: First, it is the first year that quarter dollars were coined for circulation in the United States. Second, it is the only date having the Draped Bust obverse in combination with the Small Eagle reverse design. Third, it is the only issue of the denomination coined in the 18th century. ....13,950.00

## Sharp 1796 25¢ Rarity

1796 VF-20 (PCGS). More sharply struck than the typical VF 1796 Draped Bust quarter. All of the border denticles on both the obverse and reverse are fully delineated. Miss Liberty's hair strands

are nearly fully visible, and the eagle's wing feathers show almost complete definition. Toned soft gold and rose. The surfaces are very well preserved for the grade and have just a few light hairlines visible. Free of the heavy adjustment marks so typically encountered on early Draped Bust coinage. ## Unique Proof 1823/2 Quarter

**1823/2 overdate. B-1. Proof-63 (NGC).** A lovely example having frosty design elements and glittering mirror fields. The central areas are brilliant with blushes of delicate champagne iridescence peripherally. The dentilation is full on both the obverse and reverse, and the centering is nearly perfect. This specimen is far and away the finest known example of this major rarity.

The 1823 quarter is one of the great rarities in American numismatics. It is doubtful that as many as 25 still exist today in all states of preservation. More significantly, the presently offered specimen is thought to be unique in the Proof format; all the other examples are business strikes and in generally very low grades of preservation (Good to Fine being typical). In

terms of preservation, the 1823/2 quarter dollar in any Mint State or Proof grade is far rarer than even the classic 1827 original and is dozens of times rarer than the 1796.

The pedigree of this superb piece can be traced to the early part of the 20th century. It was originally acquired by Burdette G. Johnson from an unidentified source in Europe, after which it passed through the hands of Elmer Sears into the famous collection of Waldo Newcomer. Since then it has been owned successively by the composer Jerome Kern, R. L. Miles, Jr., H. Philip Speir, and Reed Hawn. Recent years the coin has appeared in Auctions '80, '86, and '90.

It is difficult to overestimate the importance of this coin. .... 97,500.00

1917 Hermon A. MacNeil's type was redesigned, showing Miss Liberty wearing armor. It has been often stated that the redesign was for reasons of modesty, but it is more likely that the redesign symbolized America's impending entry into World War I. MacNeil's original type showed Miss Liberty prepared both for war and peace. In her right hand she holds an olive branch of peace, while her left bears a protective shield. In 1917, when it appeared certain that America was to join the Allies against the Central Powers, MacNeil's type added another symbol of preparedness for war.

War-time coinage quotas had to be filled in haste during summer 1917, and the Engraving Department found itself simultaneously making dies for the 1917 Type II and 1918 issues. A working die received a blow from a 1917 hub, and then was routinely sent to the annealing furnace to be prepared for subsequent blows. But in this case, the die, through error, was sent to the wrong press and received its other blow from a 1918 hub. As inspection failed to detect the error, the obverse die was mintmarked for San Francisco and was briefly used in coinage.

## A few words from Liz Arlin...

Variety is the spice of life, and variety is what this *Special Coin Letter* offers. Actually, not only does it offer variety—it offers varieties (of many different coins).

Early copper coins include colonials and half cents, after which you will find Flying Eagle (highlighted by a superb Proof 1856) and Indian cents. Commemorative silver and gold coins are presented in many different types and issues, each priced to be a good value. We hand pick our commemoratives (and other coins) around here, and I absolutely guarantee you will be delighted.

Be sure to check our gold listings, and note the rare 1804 quarter eagle, the seldom-seen 1829 half eagle, the exceedingly rare 1920-S eagle, and the notable 1882 \$20.

Among the territorial and pattern coins you will find an 1852 U.S. Assay Office \$50 gold piece and an extremely rare Proof 1870 pattern quarter dollar.

Mark Borckardt (Senior Numismatist) has been buying a lot of coins lately—including some very interesting old-time holdings. Selections from our new purchases are offered in this issue. Gail Watson, Debbie White, and I have been busy putting these items in the stock and preparing them for sale. In this issue, many pieces are offered for the first time.

See something of interest? Just call toll-free 1-800-222-5993 and Gail, Debbie or I will be happy to reserve your order and help in any other way. Have a numismatic question? Mark Borckardt, Ray Merena, or Dave Bowers would be glad to provide an answer.

One of the "fun" things about numismatics is reading about coins. There is no doubt that a book costing \$10, \$20, or some other nominal sum can provide many hours of reading enjoyment and open up new doors of collecting interest and activity. If you haven't already reserved your copy of Dave Bowers' new book, *Commemorative Coins of the United States: A Complete Encyclopedia*, be sure to check out the special prepublication discount offer on page 7. Orders have been pouring in for this book, making it a success before it is even published. Order now at a savings, and you'll be among the first to get your copy when it is ready.

Here at Bowers and Merena Galleries, we all look forward to receiving your order. Each coin or book we sell is subject to your complete satisfaction. We know you'll be delighted.

Sincerely yours,

*Liz Arlin*

## QUARTER EAGLES

### Superb 1804 14 Stars Reverse \$2½

- 1804 14 Stars reverse. Breen-1. AU-55. An attractive specimen of this early quarter eagle, with pleasing deep yellow surfaces on both sides. Somewhat softly struck on the left obverse periphery as is often seen on this variety. Minor adjustment marks are noted between 7:00 and 10:00 on the reverse rim. This is far nicer than the average example encountered. One of only 3,327 struck this year. - 1845 AU-58 (PCGS). Sharply struck and brilliant with just a trace of friction in the fields and on the devices. ## EAGLES

### Famous 1858 Eagle Rarity

1858 VF-25. A pleasing example of one of the most famous dates in the \$10 series. Only 2,521 eagles were struck at the Philadelphia Mint this year, the second lowest mintage of the type after the legendary 1863. Walter Breen suggests that only 12 to 15 examples survive today. This specimen is deep golden yellow on the obverse, while the reverse has rich areas of coppery golden brown toning around the protected areas. A prize for its new owner's collection. The 1858 eagle, a classic rarity, has been unappreciated in recent decades. Years ago, great attention was focused whenever an 1858 eagle crossed the auction block. .... 5,495.00

### Superb 1866-S No Motto \$10

### Superb 1907 Indian \$10 Rarity Wire Rim with Periods

1907 Indian. Wire Rim. Periods before and after reverse legends. MS-61 (PCGS). A fully lustrous, exceedingly attractive example of the most famous year of \$10 coinage. The devices are sharply defined and are complemented by wisps of light toning. A prize for the discriminating collector. .... 12,900.00

In 1905, Theodore Roosevelt contacted Augustus Saint-Gaudens, America's pre-eminent sculptor at the time, and asked him if he would redesign the entire American coinage. Roosevelt was highly impressed by ancient Greek coins he had

seen on display at the Smithsonian Institution and was particularly partial to their high relief appearance. Roosevelt felt that by comparison contemporary American issues were uninteresting.

Saint-Gaudens set about sketching his ideas. The obverse design on the presently offered \$10 issue was first suggested for use on the cent and, later, the double eagle, but finally appeared on the eagle. The facial features used are said to have been taken from Davida Clark, the artist's mistress, by whom he had a son. The headress was added to give the issue a "native American" appearance.

Of the variety offered here, just 500 examples were struck. The wire rim was found to be impractical and was abandoned. Coins of the first type are distinguished by having periods before and after the reverse legend, a feature that was discontinued when examples were subsequently minted in large quantity for circulation.

1907 Indian. No Motto. No periods. MS-63. Breath-taking full mint bloom and frost. A popular two-year only type. A superb piece for the quality-conscious collector. .... 2,695.00

1916-S MS-60. A nice example for a Mint State gold type set. .... 950.00

### Classic 1920-S \$10 Rarity

1920-S MS-60 (Hallmark). A brilliant, frosty example. Although 126,500 were minted, it is probable that most were never released and were melted following the 1933 edict which suspended gold coin production. Today it is believed that only two to three dozen are known to collectors, a number of which are in grades less than that here offered. Here is another delicacy for the connoisseur. .... 17,900.00

According to the March 1991 PCGS *Population Report*, only two examples had been submitted to that service and returned with a grade of EF-40, while only four had been graded higher. This date was lacking from the quite comprehensive offering of double eagles included in our sale of the celebrated Norweb Collection. Yet another prize for the advanced collector. .... 15,500.00

## TERRITORIAL GOLD

### 1854 Kellogg \$20

1854 Kellogg & Co. \$20 gold. EF-40. Variety with short arrowheads and KELLOGG & CO. centered on the coronet. Deep golden brown overall, with areas of coppery brown toning around the peripheries. Small area of abrasion below the eagle's right wing. A pleasing, well struck example of this popular issue. ....3,150.00

The dies for the Kellogg \$20 and \$50 survived long after the firm had dissolved itself, after 1855. In 1921 the then curator of the American Numismatic Society reported in *The Numismatist* that he had acquired two hubs and three dies for the Kellogg \$20, without recording their types. However, in the late 1940s and early 1950s, the dies for the \$50 Kellogg issue were exhibited at meetings of the Pacific Coast Numismatics Society.

### 1855 Kellogg \$20

1855 Kellogg & Co. \$20 gold. EF-45 (PCGS). Variety with short arrowheads, heavy date. A pleasing specimen with traces of mint lustre still visible in the protected areas. Bright, light yellow gold surfaces. Well struck full reverse denomination letters and bold date, as well as hair detail below Liberty's coronet. ### Extremely Rare J-879 Pattern 25c

1870 pattern quarter dollar. J-879. Proof-63 BN. (PCGS). Copper. Plain Edge. Pleasing chestnut brown surfaces with hints of mint brilliance at the rims. Most of the design features are boldly rendered. This variety, like most copper strikings of Standard Silver design types, is extremely rare. Dr. Judd's Rarity-6 rating grossly overstates the availability of the issue. We are familiar with only three or four examples of the variety, and doubt that more than just a few others exist. ....3,995.00

## Commemorative Coins of the United States A COMPLETE ENCYCLOPEDIA

Q. David Bowers

*Commemorative Coins of the United States, A Complete Encyclopedia*, by Q. David Bowers is anticipated to be published by mid 1991 and will be the most comprehensive work ever produced on commemorative coins from the 19th century to the present day. The author has spent many years carefully researching the subject, bringing together much information never before available in a single volume. This work, anticipated to be approximately 600 pages in length, will provide a comprehensive guide to silver and gold commemorative coins and will be of commanding importance to the collector, dealer, and investor alike.

A market study is given for each commemorative variety, giving the issue price and its market performance at five-year intervals ever since that time, with special intermediate prices to reflect market highs and lows. In addition, there is information concerning striking characteristics, grading, and other data.

This new work will provide fascinating reading and will become a much consulted reference for anyone with an interest in collecting or studying commemorative coins.

## Including New Purchases!

In recent weeks we have been taking advantage of values in the current market by buying! We have run multiple full-page "buy" advertisements in *Coin World*, we have put countless "buy" messages on the Teletype system, and our staff members have been traveling thousands of miles. We've been writing checks left and right! In addition we have bought some nice old-time items from sources here deep in the heart of New England.

When time permits we will catalogue these pieces in detail for our next *Rare Coin Review*. In the meantime, this listing is going to only a few selected people on our mailing list. Nearly every item is one of a kind in our stock, and by restricting the number of copies of this list we should be able to fill most of your requests if you order immediately.

You will find many new purchases as well as other excellent values in just about every numismatic field. Each coin comes with a money-back guarantee of satisfaction.

### Special \$10 Bonus!

As a way of thanking you for your business, we'll give you a \$10 bonus discount on any order of coins totaling \$100 or more from this listing! To qualify, just say "I'd like the \$10 bonus" when you order by telephone, or write this on your order blank. One to a customer. This bonus offer expires May 30, 1991.

### Enjoying Coins

A great way to enjoy coins is by buying an armful of books. Pick out titles that appeal to you, and you are on your way! In this listing we offer many interesting titles, all at special prices. If you want to read about "fun" experiences I have had with coins, order a copy of my *Adventures With Rare Coins* book. This book has gone through several printings and has been enjoyed (so far as I know) by all who have read it.

With books a relatively modest expenditure can bring many hours, days, or even weeks of pleasure. And, a good book is something you will go back to again and again.

### Important New Books

An important book publishing milestone has occurred, and another is about to happen.

(1) The first is the project we completed for the American Numismatic Association's 100th anniversary. The present writer created *The ANA Centennial History*, published in two volumes totaling 1,768 pages—a veritable library of information about the ANA, coin collecting, coin dealing, new discoveries, changing trends, the coin market, grading, personalities, and just about every other subject under the numismatic sun—a vast treasure trove of interesting and useful information. Numerous illustrations add an extra dimension of enjoyment. This two-volume set bears a list price of \$159 but can be ordered for a limited time for just \$125 (plus \$7.50 packing and shipping).

A part of the same project is the 384-page *ANA Centennial Anthology*, edited by Carl W.A. Carlson (ANA historian) and our own Michael Hodder. This separate volume includes feature articles by over 20 leading numismatic scholars and writers, a virtual Who's Who in the rare coin field. The *Anthology* lists for \$65 but is available for a limited time (or just \$50 (plus \$4 packing and shipping)).

The best deal of all is to buy both volumes of *The ANA Centennial History* and the *ANA Anthology* volume, three handsome books, all deluxe hardbound in matching bindings, total list price \$224, for just \$169 (plus \$8.50 packing and shipping). These books are now being printed and will be shipped immediately upon publication.

(2) The second book project is *Commemorative Coins of the United States: A Complete Encyclopedia*. Read all about it in this issue. It, too, is available at a special discount price, and orders have been pouring in. Delivery is expected by mid-summer. Order now and your copy will be one of the first shipped.

In addition to these new books, be sure to check our special Book Section for other great values. Each title is available to you for a special discount price!

## LARGE CENTS

|   |           |
|---|-----------|
| 1793 Liberty Cap Bisecting Crack S-14. Rantey-5 EF-40. Absolutely superb surfaces with light olive-brown color. A tiny scratch is noted behind the curls and probably should never be mentioned, for it blends nicely with the color of the coin. Obverse and reverse beading is complete and sharp, providing a well centered appearance. Usual obverse state, the die broken from top to bottom as on all known examples of this variety. This specimen, offered as Lot 25 of Auction '90, ranks as fifth finest known and is virtually tied with the Norweb example as fourth finest known. Here indeed is an American numismatic classic that has it all: basic rarity, the first year of its type, high grade, and superb aesthetic appeal. The connoisseur will appreciate this coin as one of the highlighths of his collection. | 38,500.00 |
| 1795 Lettered Edge S-75. AU-50. Lustrous deep tan fields surround sharp devices. Miss Liberty's hair strands are fully defined. A few minor planchet pits are noted on the obverse, but these are unimportant as they are common on the variety (cf. Lot 135 of the Jack H. Robinson Collection and Lot 99 of   |           |

|  |           |
|--|-----------|
| the Robinson S. Brown, Jr. Collection). A very pleasing example of the Lettered Edge variety of this year. Only 37,000 pieces are recorded as having been struck with the edge lettered ONE HUNDRED FOR A DOLLAR. A beautiful piece which will be a source of pride for the specialist.  | 4,950.00  |
| 1795 Jefferson Head S-80. Rantey-5★. VG-10. From our sale of the Norweb Collection, November 14-15, 1988, Lot 2740. Toned deep olive brown with uniform light porosity noted on obverse and reverse surfaces. Some minor edge nicks are noted along with a small attempted puncture just below the obverse center dot. Sharpness is at least VF-20 with the defects noted mentioned to provide an accurate description. This example, formerly Lot 74 of the 1953 ANA Convention Sale, just misses the low end of the Condition Census which ranges from VF-35 down to F-15.   | 21,500.00 |
| 1796 Liberty Cap S-86. Rantey-5. VG-10. A small rim bump is noted at 10 o'clock on the obverse for accuracy. Pleasing chocolate brown fields complement the central design devices. A nice example of this type. 625.00 S-87 VF-20. Very pleasing light gray-brown with some darker areas on the reverse. The majority of 1796 large cents of either design type are low grade with VF or better examples being quite scarce. 975.00 S-119 EF-45. Sharply struck, with most of Miss Liberty's hair strands boldly defined. Appealing tan fields are enhanced by traces of copper red around the design elements. Two trivial marks are noted in the right obverse field.   | 2,150.00  |
| 1797 S-139 EF-40. A lovely example of the issue. Well struck devices are enhanced by chocolate brown fields. The design elements are well centered on the planchet and the border dentities are boldly struck. Sure to delight the quality-conscious buyer.  | 1,595.00  |
| 1798 S-147 Rantey-5. Net Good-6 or better. A scarce and highly desirable variety among large cent specialists. Nice detail is present for the grade, but there is a noticeable rim bump above ST in STATES on the reverse. Call quickly on this elusive issue.   | 395.00    |
| 1799/S-188 F-12. A particularly nice and sharp example of this famous rarity, the most elusive date in the series. All central design details are very well defined for the grade. Minor porosity is visible in the fields, but does not detract from the importance of this overdate offering. An important opportunity for the specialist to acquire a sharply struck example of this issue, a coin which may well form the centerpiece of its next owner's cabinet. The 1799 cent has always been one of America's greatest numismatic classics.  | 4,950.00  |
| 1799 Uncoined Die State S-189. VF-30/30 (ANA Certificate). Reverse lightly corroded as noted on the ANA certificate. Penny Whimsy plate coin, also featured as the Guide Book plate coin from 1963 through 1965. Dr. Sheldon noted regarding this coin "... one example is known, about VF-30, with the reverse breaks at their heaviest, and with a straight line obverse crack..." Since Sheldon's description was written, no second example appears to have surfaced. This historic cent has a notable pedigree, having at one time been in the collections of such world class numismatists as Howard R. Newcomb, Dr. William H. Sheldon, Dorothy I. Paschal, Ted Natzfger, Herman Halpern, and Henry Hettger. The historical pedigree, combined with its unique die state, offers an opportunity not to be missed. | 11,795.00 |
| 1800 S-208 Rantey-3 F-15. Attractive light brown with choice surfaces for the grade. A couple microscopic scratches are noted for accuracy. Intermediate die state with rim break connecting tops of TY in LIBERTY and extending to the right. Overall, a pleasing example of this variety. Elusive in higher grades.  | 795.00    |
| 1800 S-209 Rantey-3 VF-20. Pleasing dark brown surfaces with just a few minor nicks and scratches, consistent with the grade. As a date, 1800 large cents are quite difficult to locate in Fine or better grades.  | 510.00    |
| 1801 S-216 VF-30. A pleasing piece that would make a nice addition to an early type collection. Well defined devices are surrounded by medium brown fields.  | 525.00    |
| 1801 Three Errors reverse. S-219 EF-40. Attractive gray and olive brown with choice surfaces. A particularly pleasing specimen of one of the most desired varieties in the series. This variety, listed in the Guidebook, is extremely popular. The three errors are: (1) UNITED Appears as INTED, (2) there is only one stem to the wreath, and (3) the fraction appears as the mathematically meaningless 1/000 instead of 1/100.  | 5,450.00  |
| 1802 S-242 Rantey-3 EF-45. Sharp and well-centered with virtually all of the border dentities present. The fields are soft brown with tan highlights. A lovely piece for the quality-conscious buyer.  | 1,375.00  |
| 1803 S-261 F-15. Medium brown color with nice surfaces for the grade. The arc crack on obverse extends to the left obverse rim with the bulging left of the date. Thus same obverse die, with date altered, was used many years later to produce the 1804 restrike.  | 265.00    |
| 1803 S-258. Large Praction. EF-45. A very pleasant specimen, with lightly glossy surfaces somewhat hard and smooth. Attractive rich golden brown, with olive overtones. Some planchet roughness on the reverse, but really insignifi-  |           |

Approximately 50% of Miss Liberty's hair details are clear, and many of the eagle's wing and tail feathers are boldly rendered. The obverse milling is very sharply pronounced giving the piece a pleasant appearance. 1796 quarters are highly important for several reasons: First, it is the first year that quarter dollars were coined for circulation in the United States. Second, it is the only date having the Draped Bust obverse in combination with the Small Eagle reverse design. Third, it is the only issue of the denomination coined in the 18th century. . | 13,950.00 |

This coin is sure to make a welcome addition to an early type collection.

Mostly brilliant with just a trace of light amber peripheral toning. Lightly cleaned at one time, satisfaction guaranteed.

- 1858 VF-25. A pleasing example of one of the most famous dates in all the \$10 series. Only 2,521 eagles were struck at the Philadelphia Mint this year, the second lowest mintage of the type after the legendary 1863. Walter Breen suggests that only 12 to 15 examples survive today. This specimen is deep golden yellow on the obverse, while the reverse has rich areas of coppery golden brown toning around the protected areas. A prize for its new owner's collection. ## LARGE CENTS

### Impressive 1793 Liberty Cap Cent

- 1793 Liberty Cap. Bisecting Crack. S-14. Rarity-5. EF-40. Absolutely superb surfaces with light olive-brown color. A tiny scratch is noted behind the curls and probably should not even be mentioned, for it blends nicely with the color of the coin. Obverse and reverse beading is complete and sharp, providing a well centered appearance. Usual obverse state, the die broken from top to bottom as on all known examples of this variety. This specimen, offered as Lot 25 of Auction '90, ranks as fifth finest known and is virtually tied with the Norweb example as fourth finest known. Here indeed is an American numismatic classic that has it all: basic rarity, the first year of its type, high grade, and superb aesthetic appeal. The connoisseur will appreciate this coin as one of the highlights of his collection. .... 38,500.00

- 1795 Lettered Edge. S-75. AU-50. Lustrous deep tan fields surround sharp devices. Liberty's hair strands are fully defined. A few minor planchet pits are noted on the obverse, but these are unimportant as they are common on the variety (cf. Lot 135 of the Jack H. Robinson Collection and Lot 99 of the Robinson S. Brown, Jr. Collection). A very pleasing example of the Lettered Edge variety of this year. Only 37,000 pieces are recorded as having been struck with the edge lettered ONE HUNDRED FOR A DOLLAR. - 1798 S-147. Rarity-5. Net Good-6 or better. A scarce and highly desirable variety among large cent specialists. Nice detail is present for the grade, but there is a noticeable rim bump above ST in STATES on the reverse. Call quickly on this elusive issue. .... 395.00

- 1799 S-188. F-12. A particularly nice and sharp example of this famous rarity, the most elusive date in the series. All central design details are very well defined for the grade. Minor porosity is visible in the fields, but does not detract from the importance of this overdue offering. An important opportunity for the specialist to acquire a sharply struck example of this issue, a coin which may well form the centerpiece of its next owner's cabinet. The 1799 cent has always been one of America's greatest numismatic classics. .... 4,950.00

### Pedigreed 1799 Large Cent

#### Unique Die State

- 1799 Unique Die State. S-189. VF-30/30 (ANA Certificate). Reverse lightly corroded as noted on the ANA certificate. Penny Whimsy plate coin, also featured as the Guide Book plate coin from 1963 through 1965. Dr. Sheldon noted regarding this coin "... one example is known, about VF-30, with the reverse breaks at their heaviest, and with a straight line obverse crack. ..." Since Sheldon's description was written, no second example appears to have surfaced. This historic cent has a notable pedigree, having at one time been in the collections of such world class numismatists as Howard R. Newcomb, Dr. William H. Sheldon, Dorothy I. Paschal, Ted Naftzger, Herman Halpern, and Henry Hettger. The historical pedigree, combined with its unique die state, offers an opportunity not to be missed. .... 11,795.00

- 1800 S-208. Rarity-3. F-15. Attractive light brown with choice surfaces for the grade. A couple microscopic scratches are noted for accuracy. Intermediate die state with rim break connecting tops of TY in LIBERTY and extending to the right. Overall, a pleasing example of this variety. Elusive in higher grades. .... 795.00

- 1800 S-209. Rarity-3. VF-20. Pleasing dark brown surfaces with just a few minor nicks and scratches, consistent with the grade. As a date, 1800 large cents are quite difficult to locate in Fine or better grades. .... 510.00

- 1801 S-216. VF-30. A pleasing piece that would make a nice addition to an early type collection. Well defined devices are surrounded by medium brown fields. .... 525.00

Bowers and Merena is pleased to announce the publication of three of the most important reference books ever produced.

**P**ublished in connection with the 1891-1991 Centennial celebration of the ANA, these volumes are available at a special pre-publication discount price if you order soon. Both works reflect a broad spectrum of numismatic content and interest and will be permanent references for anyone interested in the subject of rare coins. Indeed, you will refer to these books again and again as sources of information and enjoyable reading.

The first work, *The American Numismatic Association Centennial History*, by Q. David Bowers, comprises two books totalling 1,768 pages (one of 856 pages and one 912 pages) and is published in two separate, matching deluxe hardbound volumes. Over 100 chapters are included in these two volumes, plus over 200 full pages of illustrations. Bowers, a long-term member of the ANA and a past president of the Association, is one of America's best-known numismatic writers.

These two massive volumes, to the preparation of which Bowers devoted several years, chronicle the story of the American Numismatic Association, beginning with Dr. George F. Heath's publication of *The Numismatist* in 1888, the founding of the ANA in 1891, and all of the related events that have occurred in this century since that time. The author analyzes on a year-to-year basis all major numismatic, political, economic, and other situations touching the ANA and its members. The development of the ANA itself, including changing election procedures, people who serve the ANA in various elective and appointive positions, annual conventions, problems and scandals, changes in policy, management methods, growth, the funding and building of ANA Headquarters, and much, much more are delineated in fascinating detail in the pages of these two books.

In addition, a wealth of information is included concerning the growth and development of coin collecting over the years, the development of the grading policies and systems (it may come as

a surprise that the first numerical grading system was proposed at the ANA in as early as the 1890s), changes and cycles in the rare coin market, the coming and going of coin investment interests, the rise and fall in popularity of different series, and other items are developed in fascinating detail. While the emphasis of the typical ANA member has been on U. S. coins, tokens, medals, and paper money, abundant information is also included concerning world coins, paper money, ancient coins, numismatic books, and all other numismatic disciplines.

*The American Numismatic Association Centennial History* also includes full descriptions of the activities of the many noted ANA officials, rare coin dealers, and others who have been important to numismatics during the past century. It is no exaggeration to say that anyone reading this pair of volumes will upon completion have an in-depth knowledge and appreciation of just about every aspect of the rare coin hobby and market. Never before in numismatic history has such a reference set been available, and it may well be the case that no books of this importance will ever be published in the future.

**T**he third matching volume, in its own deluxe hardbound binding, is *The American Numismatic Association Centennial Anthology*, a collection of articles written by some of the most respected and well-known numismatists of our time. Edited by Carl W. A. Carlson (ANA Historian) and Michael Hodder (well-known numismatic researcher and scholar), this volume comprises 384 pages and includes ground-breaking studies by such notables as John W. Adams, David Alexander, Q. David Bowers, Walter Breen, Kenneth E. Bressett, Carl W. A. Carlson, Mrs. Elvira Clain-Stefanelli, John J. Ford, Jr., Cory Gilliland, George B. Harris III, Gene Hessler, Michael J. Hodder, Peter Huntton, Robert W. Julian, John McCloskey, Chris Neuzil, Eric P. Newman, Andrew W. Pollock III, P. Scott Rubin, and David E. Schenkman. It is undoubtedly correct to state that never before in the history of American numismatics have the works of so many distinguished writers been included between the covers of a single book! As if that were not enough, there are two articles from the past, studies written years ago by well-known collector Joseph C. Mitchelson and famous dealer B. Max Mehl.

## A COMPLETE ENCYCLOPEDIA

**C**ommemorative Coins of the United States: A Complete Encyclopedia, a new book by Q. David Bowers is anticipated to be published by mid 1991 and will be the most comprehensive work ever produced on commemorative coins from the 19th century to the present day. The author has spent many years carefully researching the subject, bringing together much information never before available in a single volume. Complete information will be given on each issue, including its conception, design, distribution, and advice for buyers. A market study is given for each commemorative variety, giving the issue price and its market performance at five-year intervals ever since that time, with special intermediate prices to reflect market highs and lows. In addition, there is information concerning striking characteristics, grading, and other data.

This new work will provide fascinating reading and will become a much consulted reference for anyone with an interest in collecting or studying commemorative coins.

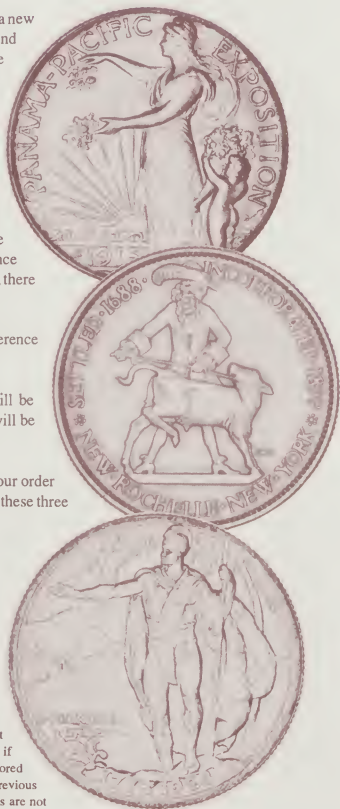

The volume will be 8½ x 11 inches in size, printed on high quality paper, and will be completely illustrated. Here indeed will be a prize book of permanent value, which will be useful for many years to come.

### Classic 1875 Gold Dollar Rarity

1875 MS-61 (PCGS). An outstanding specimen of this great American gold classic, with sharply struck devices and reflective pale orange fields. Only 400 were minted; one of the very few American gold coins with a business strike mintage of fewer than 500 pieces. As of the February 1991 *PCGS Population Report*, just six have been certified in higher Mint State grades! An exceptional opportunity for the gold coin specialist.....11,750.00

## QUARTER EAGLES

1804 14 Stars reverse. Breen-1. AU-55. An attractive specimen with pleasing deep yellow surfaces on both sides. Somewhat softly struck on the left obverse periphery, as often seen on the variety. Minor adjustment marks are noted between 7:00 and 10:00 on the reverse rim. Far nicer than the average example encountered. One of only 3,327 quarter eagles struck this year. ### Classic 1929 \$5 Rarity

1929 MS-62 (Hallmark). The mintage figure of 662,000 is irrelevant, as most were melted in 1933 and 1934. The 1929 \$5 is a key rarity and is seldom seen in any grade. The piece offered here is sharp and lustrous, with one or two tiny marks keeping it from a much higher grade. Superb aesthetic appeal and numismatic desirability add to the charm of this delightful rarity. Here is an outstanding specimen. The key issue in the 1908-1929 \$5 series. We know you will be delighted with it!.....11,500.00

## EAGLES

1858 VF-25. A pleasing example of one of the most famous dates in the \$10 series. Only 2,521 eagles were struck at the Philadelphia Mint this year, the second lowest mintage of the type after the legendary 1863. Walter Breen suggests that only 12 to 15 examples survive today. This specimen is deep golden yellow on the obverse, while the reverse has rich areas of coppery golden brown toning around the pro-

tected areas. A prize for its new owner's collection. The 1858 eagle, a classic rarity, has been unappreciated in recent decades. Years ago, great attention was focused whenever an 1858 eagle crossed the auction block.....5,495.00

### Classic 1920-S \$10 Rarity

1920-S MS-60 (Hallmark). A brilliant, frosty example of the issue. Although 126,500 1920-S eagles were minted, it is probable that most were never released and were melted following the 1933 edict which suspended gold coin production. Today it is believed that only two to three dozen are known to collectors, a number of which are in grades less than that offered here. This is another delicacy for the connoisseur.....17,900.00

Indeed, you will refer to these books again and again as sources of information and enjoyable reading.

The first work, *The American Numismatic Association Centennial History*, by Q. David Bowers, comprises two books totalling 1,768 pages (one of 856 pages and one 912 pages) and is published in matching deluxe hardbound volumes. Over 100 chapters are included in these two volumes, plus over 200 full pages of illustrations. Bowers, a long-term member of the ANA and a past president of the Association, is one of America's best-known numismatic writers.

These two massive volumes, to the preparation of which Bowers devoted several years, chronicle the story of the American Numismatic Association, beginning with Dr. George F. Heath's publication of *The Numismatist* in 1888, the founding of the ANA in 1891, and all of the related events that have occurred in the century since that time. The author analyzes on a year-to-year basis all major numismatic, political, economic, and other situations touching the ANA and its members. The development of the ANA itself, including changing election procedures, people who serve the ANA in various elective and appointive positions, annual conventions, problems and scandals, changes in policy, management methods, growth, the funding and building of ANA Headquarters, and much, much more are delineated in fascinating detail in the pages of these two books.

In addition, a wealth of information is included concerning the growth and development of coin collecting over the years, the development of the grading policies and systems (it may come as a surprise that the first numerical grading system

was proposed at the ANA in as early as the 1890s), changes and cycles in the rare coin market, the coming and going of coin investment mania, the rise and fall in popularity of different series, and other items are developed in fascinating detail. While the emphasis of the typical ANA member has been on U.S. coins, tokens, medals, and paper money, abundant information is also included concerning world coins, paper money, ancient coins, numismatic books, and all other numismatic disciplines.

*The American Numismatic Association Centennial History* also includes full descriptions of the activities of the many noted ANA officials, rare coin dealers, and others who have been important to numismatics during the past century. It is no exaggeration to say that anyone reading this pair of volumes will upon completion have an in-depth knowledge and appreciation of just about every aspect of the rare coin hobby and market. Never before in numismatic history has such a reference been available, and it may well be the case that no books of this importance will ever be published in the future.

**T**he third matching volume, in its own deluxe hardbound binding, is *The American Numismatic Association Centennial Anthology*, a collection of articles written by some of the most respected and well-known numismatists of our time. Edited by Carl W. A. Carlson (ANA Historian) and Michael Hodder (well-known numismatic researcher and scholar), this volume comprises 384 pages and includes ground-breaking studies by such notables as John W. Adams, David Alexander, Q. David Bowers, Walter Breen, Kenneth E. Bressett, Carl W. A. Carlson, Mrs. Elvira Clain-Stefanelli, John J. Ford, Jr., Cory Gilliland, George B. Harris III, Gene Hessler, Michael J. Hodder, Peter Huntton, Robert W. Julian, John McCloskey, Chris Neuzil, Eric P. Newman, Andrew W. Pollock III, P. Scott Rubin, and David E. Schenkman. It is undoubtedly correct to state that never before in the history of American numismatics have the works of so many distinguished writers been included between the covers of a single book! As if that were not enough, the *Anthology* contains two articles from the past, studies written years ago by well-known collector Joseph C. Mitchelson and famous dealer B. Max Mehl.

### Three Superb Books

Books 1 & 2: *The ANA Centennial History*, a total of 1768 pages, will be published in two deluxe hardbound volumes.

Book 3: *The American Numismatic Association Centennial Anthology* will also be published in a deluxe hardbound volume—for a total of three volumes in all! These 8.5 x 11 books will be of the finest quality, with end papers and acid-free pages for permanent reference. These three books are a veritable library of numismatic knowledge.

# SPECIAL ADVANCE OFFERING

© 1991 Bowers and Merena Galleries, Inc. ♦ Box 1224 ♦ Wolfeboro, NH 03894 ♦ SCL-1110 (Advance Offering)

## First Chance to Buy Our Brand-New Purchases!

During the past several weeks we have been taking great advantage of what we at Bowers and Merena Galleries consider to be excellent buys in the current market. There are many coins available now for prices less than they were five or even 10 years ago—and just about everything is cheaper than it was a year or two ago. We have been running full-page “buy” advertisements in *Coin World*, we have been traveling thousands of miles, and we have put innumerable “buy” notices on the Teletype system! As a result, we have purchased more coins during the past five weeks than in any other period during the past several years!

We’ve been “fussy” and have cherry-picked for quality as well as value. Most of our purchases have been spent in these series: Morgan silver dollars 1878-1921, Peace silver dollars 1921-1935, commemorative silver coins 1892-1954, and Liberty Walking half dollars of the 1930s and 1940s, but nearly all other series have been bought as well. For some popular silver dollars and commemoratives we may have bought as many as five or 10 coins of a given variety and grade, and for others we may have just one in stock. Order early, and you’ll get the very best selection. Order late, and many items will be “sold out.”

As soon as we can spare the time (we are working on several different important projects, including a large 3,000+ lot auction for the American Numismatic Association 1891-1991 Centennial Convention in Chicago in August) we will photograph and catalogue our new purchases in detail. In the meantime our super-busy schedule has advantages for you, as right now we are listing our new purchases and other values quickly—without photographs or detailed notes—and giving you first chance to buy them! Each coin comes with the famous Bowers and Merena Galleries money-back guarantee of satisfaction.

Further, if you order from this special advance offering you can take advantage of two Bonus Deals!

## Including Many New Purchases!

The rare coin market offers some of the best values we have seen in recent years, and we have backed up this thought by buying as many coins as we can. We have been running "buy" advertisements in *Coin World*, on the Teletype, and elsewhere, and our staff members (especially Mark Borckardt, our senior numismatist) have been traveling thousands of miles. We've written so many checks that I can't keep track of them!

We have bought several important properties, including a fine collection stored in a vault on Long Island for many years, a dazzling group of commemorative coins from the Midwest, a memorable collection of Buffalo nickels, some of the nicest Morgan silver dollars I've seen in recent years, and much more—including quite a few items from near our offices deep in the heart of New England.

We had all good intentions of cataloguing these for our *Rare Coin Review* but the tremendous amount of work we have all expended creating the mammoth 456-page catalogue for our forthcoming American Numismatic Association 1891-1991 Centennial Convention Auction Sale (to be held next month in Chicago) diverted our attention, and the *Rare Coin Reviews* is not done. We hope to start on the detailed coin listings within the next two or three weeks, but in the meantime this SPECIAL ADVANCE OFFERING in the form of a "quick listing"—with no photographs and just enough commentary to give you a picture of the coins' surfaces in your mind's eye—will give you FIRST CHANCE at our new buys and other values!

This SPECIAL ADVANCE OFFERING is going only to a few people on our mailing list. Nearly every item is one-of-a-kind in our stock, and by sharply restricting the number of copies of this list we should be able to fill most of your requests if you order immediately. I suggest using the telephone, toll-free at 1-800-222-5993. The difference between telephoning your order right away and sending it by mail may mean whether or not you get a particular coin!

Each coin comes with our money-back guarantee of satisfaction.

### A Special Bonus Discount

Business has been terrific here, and we have had an unprecedented response to our recent catalogues and to our Want List Service. As a way of saying thank you for your business, we'll give you a \$10 bonus discount on any order of coins totaling \$10 or more from this listing. To qualify please say, "I'd like the special bonus" when you order by telephone, or write this on your order if you send it by mail. One bonus discount per customer. This offer expires on July 30, 1991—which isn't very far away!

### The Key to Pleasure

A great way to enjoy coins is to buy interesting books about them. I would like to bring you up to date on two important publishing projects:

(1) As you probably know, the American Numismatic Association employed our Graphic Arts Department to create for them three volumes in connection with the 100th anniversary of the ANA. The first work, consisting of two beautiful gold-stamped illustrated, hardbound volumes written by me (Q. David Bowers), comprises 1,768 pages, is titled *The ANA Centennial History*, and tells about the history of the ANA, the development of coin collecting, the rise of the investment market, dealer and collector personalities, changing trends, and just about everything else under the numismatic sun. Mr. A.C., a well-known book collector, said that these two volumes were the equivalent of an entire library of knowledge! This set bears a list price of \$159 but can be ordered before August 31st (more about this later) for a special discount price of \$125 plus \$7.50 packing and shipping.

A part of the same project is the 384-page *ANA Centennial Anthology*, edited by Carl W.A. Carlson and Michael J. Hodder, in a matching gold-stamped hardbound binding, containing articles by over two dozen of America's best-known and respected numismatic scholars and writers. *The Anthology* lists for \$65 but is available until August 31st for just \$50 (plus \$4 packing and shipping).

Now to the "new news" part, and to a special deal: Only 1,500 sets of *The ANA Centennial History* were printed, and as these words are being written, orders continue to pour in, and only 392 sets remain! After they are gone we will be SOLD OUT! It is probably a waste of effort to even mention this here, and to give our special deal, for if I do nothing more at all, the books will probably sell out anyway! After all, the grand 1891-1991 ANA Centennial Convention (which, I understand, will feature a special display and booth offering books) hasn't even been held yet!

A couple of months ago we made a special deal by which you could buy both volumes of *The ANA Centennial History*, plus the separate *Anthology* volume, all in matching deluxe hardbound bindings, total list price \$224, for just \$169 (plus \$8.50 packing and shipping). Now, as I mentioned, *The ANA Centennial History* is nearly sold out! The reason I am mentioning this special \$169 (plus \$8.50 shipping) deal here is that I would like to have YOU order right now. If you don't do so, then surely someone else will get YOUR books! By the way, there are no plans to reprint the volumes, due to their great production cost, but if they are they will be in a different binding so as to isolate the 1,500 original sets and make them forever distinctive.

(2) The second book is my *Commemorative Coins of the United States A Complete Encyclopedia*, which has just been sent to the printer. This huge 768-page, completely illustrated book has drawn rave reviews from those to whom we've sent advance proofs. A special discount price is available from now until August 31, 1991, after which it will be increased. You can take your pick of three different bindings, one of which is on the way to being sold out:

Regular softbound: List price \$39.95; special discount price (until August 31, 1991): \$29.95

Quality hardbound: List price \$49.95; special discount price (until August 31, 1991): \$39.95

A special deluxe hardbound edition, limited to just 900 copies numbered and hand-signed by the author (me): List price \$75.00; special discount price (until August 31, 1991): \$54.95. These have been selling like hotcakes, and already 457 of the 900 have been spoken for!

In addition to these great new books, be sure to check our special "Numismatic Books" section at the end of this listing for other superb values. Each title is available for a special discount price!

## Spotlight on silver dollars and commemoratives

*Including new purchases!*

### AN EYE ON VALUES!

With an eye on the excellent values obtainable in today's market we have been buying coins like there's no tomorrow! At conventions, through the mail via full-page ads in *Coin World*, and by writing letters we've been building our stock of choice and desirable coins. It is my opinion that there are many values available today that haven't been seen for several years or more. And, it is not easy to buy, for Ray Merena, Mark Borkardt, Liz Arlin, and I are really "fussy." Often we will review a dozen coins before finding just one that offers the right combination of aesthetic appeal, technical grade, and value for the price paid.

Front row center in our buying activities have been two of the series most popular with our clients: silver dollars and commemorative coins. In this issue you can pick and choose your favorites from our new purchases and other values. Each coin comes with the famous Bowers and Merena money-back guarantee of satisfaction. I know you'll be delighted with our quality!

### A \$10 CASH BONUS!

As a Thank You for your business a \$10 cash bonus or rebate is yours instantly when you place an order for coins totaling \$100 or more from this *Special Coin Letter*. Limit: one bonus per client. Just mention "Please give me the \$10 bonus" when you telephone, or write this on your order blank.

### IT'S EASY TO ORDER!

Ordering from this listing is as simple as A-B-C. The fastest way is to call toll-free at 1-800-222-5993. In a matter of seconds Liz Arlin, Gail Watson, or Mark Borkardt will be on the other end of the line to reserve what you need. As most coins are one-of-a-kind in our stock, the difference between telephoning and writing can determine whether a chosen coin is yours or goes to someone else. I expect a very enthusiastic response from this listing, so order as early as you can. The orders from our most recent *Special Coin Letters* have been unprecedented, a sure sign that knowledgeable collectors sense that now is a good time to buy!

Be sure to check our book listings, too. There are some terrific discount deals in store for you, some of which expire on August 31st.

Thank you for your friendship and business. I hope you are having a nice summer!

Sincerely yours,

Q. David Bowers

## The Bowers and Merena Comparison Test

The famous Bowers and Merena Galleries Comparison Test states that the value of coins we deliver will be fully equal to or greater than you can find from any other source. We are sure you will find that, as you build your collection, we will be the very best source in the business. After you receive an order, we encourage you to compare the coins received, item by item, with those available elsewhere. Make an in-person comparison of the coins delivered—since comparing to pieces advertised by others (but not actually seen by you) without examining the quality is not meaningful. You have 30 days to do this (seven for certified coins). We would be surprised if, in the course of examining many coins, you returned a single item!

## Your Opportunity to Take First Pick of a FANTASTIC Group of Selected Coins!

We have just purchased one of the most *fantastic* holdings of selected rare coins to change hands in recent years. It consists of hand-picked, selected quality PCGS, NGC, and ANACS certified coins in three of the most popular series in American numismatics:

**Walking Liberty half dollars  
of the 1930s and 1940s**

**Morgan silver dollars  
1878-1921**

**Commemorative half dollars  
1892-1954**

We are extremely pleased to be able to offer you first pick of one of the most attractive group of coins to come our way (and yours) in a long time. Each coin is brilliant or very lightly toned in an attrac-

tive manner and is fully lustrous. Each coin has been cherry-picked by our very particular staff so that it has an excellent aesthetic appearance in addition to its technical grade. You will be proud to own and display each of these superb selections. Each of these is among the finest of its grade level in existence.

In other words, here is a group of coins for the quality conscious connoisseur who seeks coins that have tremendous eye appeal as well as being a good value for the money spent.

For each coin ordered, we will send the nicest piece in stock, regardless of grading service (NGC, PCGS, or ANACS). We realize that some clients have a specific preference for a given service, and if this is the case with you, please notify us of this so that we may fill your order in this manner (subject to availability).

Please remember that requesting a specific service will limit our ability to fill your order. When we purchased this remarkable group of coins, we considered the coin itself, not the grading service. You might want to do likewise.

### **You Have First Pick!**

We plan to advertise coins from this holding in *Coin World* and *Numismatic News*, and when we do, we expect many issues to SELL OUT quickly. By means of this Special Advance Offering we give you first pick of what you want. In addition, we include some really attractive sets and combination offers.

For most of the varieties we list, our stock ranges from one coin to perhaps a dozen or so. Once these are gone, it will be very difficult for

us to replace our stock at current levels. Among certain issues, coins of high aesthetic quality are so hard to find that it is necessary to examine a dozen or more certified pieces in order to find one that is just right!

Check this listing carefully, and then for fastest service call us toll-free (between 9 a.m. and 5 p.m. Eastern time) at **1-800-222-5993** to reserve the coins you want. Or fax us your order anytime day or night and include your name, address, and credit card number; our special 24-hour fax telephone number is **603-569-5319**.

### **Guarantee of Satisfaction**

So confident are we that you will find these to be of exceptional quality for the grades, that we offer a 30-day money-back guarantee of satisfaction.

Our staff has spent many hours poring over coins and selecting only those for your purchase consideration that meet our "fussy" standards. Each coin

would be a wonderful addition to even the most advanced collector's holdings.

But, just to make you feel secure in purchasing such high quality material, we offer an unconditional 30-day money back guarantee. If within 30 days of receipt, you are not completely delighted—for any reason we will gladly refund your money.

If you are a long-term customer with Bowers and Merena Galleries, you know all about the excellent quality and value we deliver. However, if you're new to our clientele, this guarantee means that you take no chance whatever when you buy from us. We guarantee you'll be *absolutely delighted!*

## LIBERTY WALKING HALF DOLLARS

**A Beautiful Design!**

The Liberty Walking half dollar made its debut in 1916, when noted artist Adolph A. Weinman produced a motif which was stunningly beautiful, as a replacement for the Barber or Liberty Head coinage which had been used from 1892 to 1915.

Numismatists and the public alike praised the new design for its beauty. The annual Mint Report noted, in part:

By far the most notable achievement of the Mint service during the fiscal year 1916 was the selection...of new designs for the dime, quarter-dollar, and half-dollar pieces. For the first time in the history of our coinage there are separate designs for each of the three denominations, and their beauty and quality, from a numismatic standpoint, have been highly praised by all having expert knowledge of such matters to whom they have been shown.

Liberty Walking half dollars were produced from 1916 to 1947 inclusive.

Especially popular with buyers today are the issues of the 1930s and 1940s, which combine very attractive current market prices with outstanding beauty of design.

If you are beginning a collection, we recommend that you acquire a "short set" with all Philadelphia, Denver, and San Francisco mint varieties from 1941 through 1947—a set which on its own makes a fantastic display. Note our offer of Special Liberty Walking Half Dollar Collection No. 1 which gives you the opportunity to buy a complete set of superb 1941-1947 coins for a very attractive discount price!

If you want to go back further in time, the present selection gives you the chance to buy pieces dated from 1934 through 1940 as well. Never before in the history of our company have we been able to present such a beautiful offering to our buyers.

Take your pick today, and send your order! If you order by telephone (which we recommend), we can confirm the availability of the coins when you call. If you order by mail, please list alternate choices whenever possible, as many issues, especially among the Denver and San Francisco varieties (D and S), are extremely hard to find in selected MS-63, MS-64, and MS-65 quality, and our stock is very limited. Alternate choices will be used only when the first items ordered have been sold.

## MORGAN SILVER DOLLARS

### One of America's Most Popular Series!

Today, Morgan silver dollars lead the popularity hit parade in American numismatics. The reason for this? The answer is simple: Many different varieties are available in Mint State for relatively low prices. A large, heavy, and impressive Morgan silver dollar minted in 1881, for example, is cheaper in Mint State than a small-size Indian cent of the same date.

As part of our recent purchase, we have acquired a beautiful group of hand-picked MS-63, MS-64, and MS-65 Morgan silver dollars certified by PCGS, NGC, and ANACS. Each coin is lustrous and frosty, is brilliant or very lightly toned in an attractive way, and is of excellent aesthetic appeal. Each is one of the finest of its grade level.

### A Bit of History

In 1878, Western silver mining interests backed the passage in Congress of the Bland-Allison Act, which mandated that the government buy millions of ounces of silver each month, although at the time there was no need for large quantities of new silver coins in circulation. Under this and subsequent legislation, silver metal was coined into silver dollars of a new design, by George T. Morgan. An Englishman by birth, Morgan had come to the United States in 1876 at the request of Chief Engraver Barber, who had been impressed with his work and who hired him for the Mint Engraving Department. Years later, in 1917, Morgan ascended to the post of chief engraver.

From 1878 onward, large quantities of Morgan-design silver dollars were minted. While many of these were released into circulation at the time, many others were put in storage. Decades

later, after Morgan dollars were no longer being minted, the government occasionally released coins for use as gifts at holiday time, and at other occasions when the Federal Reserve System had call for them.

In the autumn of 1962 a number of 1000-coin bags of 1903-O silver dollars were released for face value. At the time, the 1903 New Orleans Mint dollar in Uncirculated grade catalogued for a whopping \$1,500 in the Guide Book of U.S. Coins, and examples were so rare that most experienced collectors and dealers had never seen one! A "treasure rush" ensued, and collectors and others besieged the Federal Reserve System and completely cleaned out the stock of silver dollars from years past, except for three million coins, mainly Carson City issues, which the government kept back and later sold at a premium to collectors. Today in 1991 the Treasury stocks have long since been depleted, and all Morgan dollars—even well-worn ones of common dates are collectors' items.

### Our Special Offer

In the years since 1962, collectors and dealers have made a very active market in Morgan dollars. Most dates and varieties are readily available, and for less than \$100 per coin—sometimes much less—a very nice collection of MS-63 coins can be assembled. Other coins cost over \$100 in MS-63 grade, but only relatively few cost over the \$1000 level.

The combination of beauty, availability, and low price has made Morgan dollars favorites with collectors. Here at Bowers and Merena Galleries it is always a challenge to keep coins in stock, for it seems that as soon as we buy a few dozen or a few hundred, they are sold!

Recently, we purchased a very beautiful group of hand-picked Morgan dollars, as earlier noted. We offer these below. Most of the issues are limited in our stock, so please order early for the best selection!

If you are a collector of Morgan dollars—or would like to become one—this is an ideal opportunity to acquire some really beautiful coins!

## COMMEMORATIVE HALF DOLLARS

### A Market Opportunity!

Did you know that some commemorative coins cost only half as much today as they did a year or two ago? It's true! The present market—and this special listing—offer many important opportunities to start a collection of classic commemorative silver coins of the 1892-1954 era, or to add to the collection you already have.

As part of our special purchase we have the finest holding of quality commemorative silver coins in our company's history! Each coin is a hand-picked brilliant or attractive lightly toned MS-63, MS-64, or MS-65 specimen certified by PCGS, ANACS, or NGC. These are the cream of the crop of certified coins—single coins which in some instances represent the pick of the "litter" of a dozen or more specimens! If you want quality combined with excellent value for the price paid, your search stops here!

As many of the commemoratives we offer are one-of-a-kind in our stock and are not easily replaced, order early!

### What the Guide Book Says

*A Guide Book of U.S. Coins*, the most popular book ever written on the subject of coin collecting, pays this tribute to commemoratives:

Commemorative coins have been popular since the days of the Greeks and Romans. In the beginning they served to record and honor important events, and in the absence of newspapers they proved highly useful in passing along news of the day.

Many modern nations have issued commemorative coins, and such pieces are highly esteemed by collectors. Yet no nation has surpassed our own country when it comes to commemorative coins, and in this we have reason to be proud.

The unique position occupied by commemoratives in U.S. coinage is largely due to the fact that with few exceptions all commemorative coins have a real historical significance. The progress and advance of people in the New World are presented in an interesting and instructive manner on the com-

memorative issues. Such a record of facts artistically presented on our... memorial issues appeals strongly to the collector who favors the historical side of numismatics.

In addition to their historical appeal, commemoratives have the advantage that they can be collected without undue difficulty (in most instances) in Mint State grades. Many issues have very low mintages—productions of 25,000 or fewer coins—and are legitimately scarce or rare. And yet, some of these varieties can be collected in MS-63 or MS-64 grades for prices in the \$200 to \$500 range, or even less! Any way you look at them, commemoratives offer some mighty fine buys in today's market!

When types are listed, date or mintmark varieties are of our choice. All are of the half dollar denomination except the 1893 Isabella 25¢ and the 1900 Lafayette \$1. Take your pick of these beauties:

<sup>1</sup> In the commemorative half dollar series, the Alabama issues are among the most difficult to find with aesthetically pleasing surfaces. We are eager buyers at close to full market price for coins of the quality we offer here in various grades.

<sup>2</sup> Mintage: Just 10,000. One of the three rarest commemorative design types. This issue is scarcer than the other two (Hudson and Old Spanish Trail) as most were sold to the public, rather than to numismatists, and fewer were preserved.

<sup>3</sup> Mintage: Just 10,000. One of the three rarest commemorative design types.

<sup>4</sup> From an original group of five coins ordered from the issuing authority in 1935 and kept intact since that time! NGC certification; attractive, lightly toned, lustrous surfaces.

<sup>5</sup> The 1935-S and 1936-D San Diego halves are from an original hoard kept intact since the 1930s. We had the chance to cherry-pick a large group to select those with the best surfaces for the grades indicated.

<sup>6</sup> Mintage: Just 10,000. One of the three rarest commemorative design types.

## COMMEMORATIVE HALF DOLLARS

**Special Commemorative Offer No. 1.** Discount Specials: Buy five or more coins from the preceding listing and take a 5% discount. Buy 10 or more and take an 8% discount. Buy 20 or more and take an 8% discount.

**Special Commemorative Offer No. 2.** Build a 1936 Collection: The year 1936 was the premier time for issuing commemoratives, and more coins were made with this date than any other in the history of American numismatics. We have hand-picked two collections of 1936-dated coins, one in MS-64 grade and the other in MS-65 grade, each containing 17 different designs. Each collection contains these issues: 1936 Albany, Bay Bridge, Bridgeport, Cincinnati (quite scarce), Cleveland, Columbia, Delaware, Elgin, Gettysburg, Long Island, Lynchburg, Norfolk, Rhode Island, Robinson, San Diego,<sup>1</sup> Wisconsin, and York—a beautiful display! MS-64 set (regular total price: \$4494) for \$3995. MS-65 set (regularly \$9920) for \$8995.

**Special Commemorative Offer No. 3.** Two Coins by Two Sculptors: In the entire history of commemoratives there are just two half dollars featuring as their motifs sculptures which were created by the same person who designed the commemorative coin. One is the 1925 Stone Mountain half dollar designed by noted sculptor Gutzon Borglum, and the other is the 1936 Elgin half dollar designed by noted sculptor Trygve Rovelstad. Buy a pair in MS-63 grade (regular price: \$324) for \$299. MS-64 pair (regularly \$374) for \$349. MS-65 pair (regular price: \$890) for \$825.

**Special Commemorative Offer No. 3.** Starter Collection: Our hand-picked selection of different commemorative design types of the 1892-1954 era—a wonderful start on a beautiful collection! Our choice of varieties. Satisfaction guaranteed. \$2,500 or more value per our regular prices. (Naturally, you get more different varieties in an MS-63 set than in an MS-64 or MS-65 set, for the same amount of money.) Specify the grade you want: MS-63, MS-64, or MS-65. Collection for, net: \$2250.

**Special Commemorative Offer No. 4.** Expanded Starter Collection: As above, but \$5,000 or more value per our regular prices. Specify the grade you want: MS-63, MS-64, or MS-65. Collection for, net: \$4500.

**Special Commemorative Offer No. 5.** Our Most Extensive Starter Collection: As above, but \$10,000 or more value per our regular prices. Specify the grade you want: MS-63, MS-64, or MS-65. Collection for, net: \$8975.

<sup>1</sup> Whereas all of the other varieties in Special Commemorative Offer No. 2 were first issued in 1936, the San Diego was first issued in 1935; the specimen sent to you will be the 1936-dated issue, the 1936-D.

good value for the money spent.

For each coin ordered, we will send the nicest piece in stock, regardless of grading service (NGC, PCGS, or ANACS). We realize that some clients have a specific preference for a given service, and if this is the case with you, please notify us of this so that we may fill your order in this manner (subject to availability). When we purchased this remarkable group of coins, we evaluated the coin itself, not the grading service. You might want to consider this also.

**You Have First Pick!**

We plan to offer these coins to our entire Bowers and Merena family of coin buyers, and when we do, we expect many issues to SELL OUT quickly. By means of this "FLASH" Bulletin we give you (as one of our most recent coin purchasers) first pick of what you want. In addition, we include some really attractive sets and combination offers.

For most of the varieties we list, our stock ranges from one coin to perhaps a dozen or so. Among certain issues, coins of high aesthetic quality are so hard to find that it is necessary to examine a dozen or more certified pieces in order to find one that is just right!

Check this listing carefully, and then for fastest service call us toll-free (between 9 a.m. and 5 p.m. Eastern time) at **1-800-222-5993** to reserve the coins you want. Or fax us your order anytime day or night and include your name, address, and credit card number; our special fax telephone number is 603-569-5319.

**Guarantee of Satisfaction**

So confident are we that you will find these to be of exceptional quality for the grades, that we offer a 30-day money-back guarantee of satisfaction. Our staff has spent many hours poring over coins and selecting only those for your purchase consideration that meet our "fussy" standards. Each coin would be a wonderful addition to even the most advanced collector's holdings.

But, just to make you feel secure in purchasing such high quality material, we offer an unconditional 30-day money back guarantee. If within 30 days of receipt, you are not completely delighted—for any reason—we will gladly refund your money.

If you are a long-term customer with Bowers and Merena Galleries, you know all about the excellent quality and value we deliver. However, if you're new to our clientele, this guarantee means that you take no chance whatever when you buy from us.

We guarantee you'll be *absolutely* delighted!

# The 1991 "America" Medal By Frank Gasparro

*Order your 1991  
"America" medal today  
for the special  
price of only  
\$35! Details  
below.*

**F**rank Gasparro, former Chief Engraver of the United States Mint, has created one of his finest productions, the goddess "America" now available in her full-length glorious beauty on a limited-edition gem Proof silver medal. America, holding an olive branch for peace, is set against a resplendent background of clouds, rays, and stars. The initials of the designer, F.G., appear prominently at the lower right.

Commissioned by Bowers and Merena Galleries, Inc., the reverse die is the standard Bowers and Merena griffin logotype used in their illustrious silver art medals since their inception in 1982, the start of the longest-running continuous series of medals ever produced by any professional numismatist or professional numismatic firm.

It has been the successful aim of Bowers and Merena Galleries to create medals which are truly limited in production and distribution. No more than 1,000 1991 "America" medals will be struck, and any orders over this amount will be returned to the senders. In an era in which tens of thousands or hundreds of thousands of medals are produced in some series, the Bowers and Merena pieces are remarkable for their rarity.

Each piece is on a specially polished .999 fine 1-ounce silver

planchet and has gem Proof mirror fields with cameo frosted letters and devices, a triumph of engraving and numismatic art. Each medal is slightly larger in diameter than a silver dollar. Examples of the "America" medal may be ordered by check or credit card for \$35 each, subject to availability and to a limit of 1,000 total production. If any remain after December 31, 1991, the price will be increased to \$39.95 each. Limit: 10 medals per order. Include \$3 per order for shipping and handling.

Two forthcoming 1992 Bowers and Merena medals by Frank Gasparro have been announced and can be ordered now at a special pre-issue price. These are as follows: "America" medal in silver, as preceding, but with 1992 date. \$35.

Christopher Columbus America Discovery medal featuring a depiction of the famous explorer. 1992 date. \$35.

1992-dated medals will be shipped early in the 1992 year.

All three different medals can be ordered for a special price of \$100 plus \$3 postage and handling.

Send remittances by mail to Bowers and Merena Galleries, Inc., Commemorative Medal Department, Box 1224-NR, Wolfeboro, NH 03894, or toll-free for credit card orders, **1-800-222-5993**.

<sup>1</sup> In the commemorative half dollar series, the Alabama issues are among the most difficult to find with aesthetically pleasing surfaces. We are eager buyers at close to full market price for coins of the quality we offer here in various grades.

<sup>2</sup> Mintage: Just 10,000. One of the three rarest commemorative design types. This issue is scarcer than the other two (Hudson and Old Spanish Trail) as most were sold to the public, rather than to numismatists, and fewer were preserved.

<sup>3</sup> Mintage: Just 10,000. One of the three rarest commemorative design types.

<sup>4</sup> From an original group of five coins ordered from the issuing authority in 1935 and kept intact since that time! NGC certification: attractive, lightly toned, lustrous surfaces.

<sup>5</sup> The 1935-S and 1936-D San Diego halves are from an original hoard kept intact since the 1930s. We had the chance to cherrypick a large group to select those with the best surfaces for the grades indicated.

**Build a 1936 Collection:** The year 1936 was the premier time for issuing commemoratives, and more coins were made with this date than any other in the history of American numismatics. We have hand-picked two collections of 1936-dated coins, one in MS-64 grade and the other in MS-65 grade, each containing 17 different designs.

This Special Commemorative Offer has been exceptionally popular, containing as it does many different issues with fascinating histories. Each collection contains these issues: 1936 Albany, Bay Bridge, Bridgeport, Cincinnati (quite scarce), Cleveland, Columbia, Delaware, Elgin Gettysburg, Long Island, Lynchburg, Norfolk, Rhode Island, Robinson, San Diego, Wisconsin, and York—a beautiful display! MS-64 set (regular total price: \$4,524) for \$3,995. MS-65 set (regularly \$10,203) for \$9,199. Limit: one set per buyer (your pick of grade). Sorry, no orders accepted from dealers.

**Special Commemorative Offer No. 3.**

**Starter Collection:** Our hand-picked selection of different commemorative design types of the 1892-1954 era—a wonderful start on a beautiful collection! Our choice of varieties. Your choice of grades: MS-64 or MS-65. Satisfaction guaranteed. \$2,500 or more value per our regular prices. Specify the grade you want: MS-64 or MS-65. Collection for, net: \$2,250.

Whereas all of the other varieties in Special Commemorative Offer No. 2 were first issued in 1936, the San Diego was first issued in 1935; the specimen sent to you will be the 1936-dated issue, the 1936-D.

# The 1991 "America" Medal By Frank Gasparro

Order your 1991  
"America" medal today

for the special  
price of only  
\$35! Details  
below.

**F**rank Gasparro, former Chief Engraver of the United States Mint, has created one of his finest productions, the goddess "America" now available in her full-length glorious beauty on a limited-edition gem Proof silver medal. America, holding an olive branch for peace, is set against a resplendent background of clouds, rays, and stars. The initials of the designer, F.G., appear prominently at the lower right.

Commissioned by Bowers and Merena Galleries, Inc., the reverse die is the standard Bowers and Merena griffin logotype used in their illustrious silver art medals since their inception in 1983, the start of the longest-running continuous series of medals ever produced by any professional numismatist or professional numismatic firm.

It has been the successful aim of Bowers and Merena Galleries to create medals which are truly limited in production and distribution. No more than 1,000 1991 "America" medals will be struck, and any orders over this amount will be returned to the senders. In an era in which tens of thousands or hundreds of thousands of medals are produced in some series, the Bowers and Merena pieces are remarkable for their rarity.

Each piece is on a specially polished .999 fine 1-ounce silver

planchet and has gem Proof mirror fields with cameo frosted letters and devices, a triumph of engraving and numismatic art. Each medal is slightly larger in diameter than a silver dollar. Ex-

amples of the "America" medal may be ordered by check or credit card for \$35 each, subject to availability and to a limit of 1,000 total production. If any remain after December 31, 1991, the price will be increased to \$39.95 each. Limit: 10 medals per order. Include \$3 per order for shipping and handling.

Two forthcoming 1992 Bowers and Merena medals by Frank Gasparro have been announced and can be ordered now at a special pre-issue price. These are as follows: "America" medal in silver, as preceding, but with 1992 date. \$35.

Christopher Columbus America Discovery medal featuring a depiction of the famous explorer. 1992 date. \$35.

1992-dated medals will be shipped early in the 1992 year.

All three different medals can be ordered for a special price of \$100 plus \$3 postage and handling.

| In 1916 Adolph A. Weinman's beautiful Liberty Walking motif replaced the Barber design. The new half dollar was highly acclaimed by the public and numismatists alike. Ever since then it has been high on the popularity parade with collectors. Basically, we have found that these are among the most popular ways to collect the series: |          |
| 1. Build a collection of all dates and mints from 1916 to 1947, with the earlier issues 1916-1929 in whatever grades you can afford, and later pieces in Mint State.   |          |
| 2. Build a set of the dates and mints from 1933-S to the end of the series in 1947, in Mint State.   |          |
| 3. Build a "short set" of the dates and mints from 1941 to 1947 in Mint State.   |          |
| We recently acquired a magnificent group of half dollars dated in the 1934-1947 years, in Mint State, and hand picked for their quality and beauty. Use this listing as an ideal way to start a collection of these popular coins or to add to a collection you already have.  |          |

| 1875-S/CC MS-64, with small chopmark. If not for one small chopmark on the reverse, this coin would be worth thousands of dollars. This coin is absolutely superb in every other respect (and a case can be made that the chopmark adds historical interest; indeed, a new collectors' group has been formed recently to study and appreciate coins with chopmarks). The aesthetic appeal of the coin is unimprovable. Sharply struck. Brilliant frosty fields with delicate golden toning..... | 2,195.00  |
| 1878-CC EF-40 (NGC). Iridescent toning is noted over subdued lustre. Sharp detail is present for the grade. A minor rim bump is noted at 11 o'clock on the obverse for accuracy.....  | 1,895.00  |
| 1878-CC MS-65 (INS). Exceedingly sharply struck, well centered, with smooth, satiny, lustrous fields overlaid with magenta and gunmetal-blue toning of medium intensity.....  | 24,700.00 |
| 1881 Proof-65. Mirrored fields are lightly toned in gorgeous iridescent hues. The central motifs are struck to full advantage and are highlighted by full cameo frost.....  | 8,250.00  |
